

Grass & Grain Community Obituary

Jerome “Jerry” S. Pitney 1938-2017

Jerome “Jerry” S. Pitney, 79, of Wamego, Kansas, passed away Friday, December 1, 2017 following a lengthy illness.

Jerry was born September 4, 1938 in Wamego, Kansas, the son of Jerome J. and Freda L. (Smith) Pitney. He attended Wamego schools and graduated in the class of 1956 from Wamego High School. He lived in Wamego all but a few years of his life. In December of 1958, he married Carol Jean Ebert in Wamego and together had three sons. They later divorced. He then married Willette Martin and they later divorced.

Following high school, Jerry went to work on the family farm. He also worked as the parts manager for Wamego Truck and Tractor from 1975-1985 before attending Missouri Auction School. He worked as an auctioneer for 22 years until his retirement. During that time, he was a faithful member of the Kansas Auctioneers Association, serving one term as president, and in 2014 was honored with an induction into the Kansas Auctioneers Hall of Fame.

Jerry was an avid K-State sports fan, especially baseball. He attended every sporting event he could with his favorites being those played by his grandchildren. He loved finding opportunities to get the family together, especially for the 4th of July festivities in Wamego; with the fireworks display, carnival, and parade he enjoyed since childhood. In more recent years, he wasn't just a viewer but a parade entry; chauffeuring his grandchildren down Main Street in his vintage car. Friends and family also enjoyed celebrating holidays with Jerry's special homemade hand-cranked ice cream.

Survivors include his three sons: Jerome (Neoma) Pitney, Farmington, N.M., Russell (Wanda) Pitney, Abilene, KS, Rodney (Pam) Pitney, Alma, KS; three grandchildren: Brandy (Andy) Braun, Sophia (Avery) Simecka, and Eli Pitney; two great-grandchildren: Jynger Woodward and Mason Braun; two step great-grandchildren: Dallas and Cody Braun; one sister, Patricia (Charles) Smith, Overland Park, KS; nieces: Nancy (Glen) Stramel and Carol Ann (Aaron) Garton; nephews: Mark (Roxanne) Smith and Bruce (Kim) Smith and many great nieces and nephews.

Funeral services for Mr. Pitney will be at 11 a.m. Friday, December 15, 2017 at the Stewart Funeral Home of Wamego. Burial will follow in the Wamego City Cemetery. Jerry will lie-in-state on Thursday, December 14, beginning at 2 p.m. at the funeral home and visitation from 6-8 p.m. In lieu of flowers, the family suggests memorials to the St. Luke's Episcopal Church or to the Kansas Auctioneers Association & Auxiliary Scholarship Program, and may be left in care of Stewart Funeral Home, PO Box 48, Wamego, KS 66547.

Kansas Hay Market Report

Hay market activity slow; demand moderate to good. Offerings of grinder hay light, with prices trending higher for alfalfa and firm for grass hay. According to the U.S. Drought Monitor, conditions have deteriorated in Kansas as areas of abnormally dry (D0) and moderate drought (D1) expanded in response to below-normal precipitation and above-average temperatures during the past 30 to 60 days, and there have been reports of signs of negative impact to the winter wheat crop. Scattered below-normal stream flows and below-normal precipitation during the past 30 days led to expansion of areas of moderate drought in south-central Kansas. The abnormally dry (D0) category increased to 47.12 pct, while moderate drought (D1) increased to 15.33 pct. The Kansas Forage and Grassland Council is having their annual conference on December 12 in Salina. Visit their website at www.ksfgc.org for more information and registration. If you have hay for sale, and/or need hay here in Kansas, use the services of the Internet Hay Exchange: www.hayexchange.com/ks.php.

Southwest Kansas

Dairy alfalfa steady to .05/point higher, grass hay steady, grinding alfalfa and ground/delivered 5.00 higher; movement slow. Alfalfa: horse, small squares 240.00-250.00. Dairy, .85-.95/point RFV, Supreme 155.00-175.00, Premium 155.00-165.00, Good 135.00-155.00. Stock or Dry Cow alfalfa, 110.00-120.00. Fair/Good grinding alfalfa, 120.00-130.00. Ground and delivered locally to feedlots and dairies, 140.00-150.00. Grass hay: Bluestem large squares 80.00-90.00. Brome, none reported. The week of 11/26-12/02, 9,325T of grinding alfalfa and *760T of dairy alfalfa were delivered. Cornstalks: large round 55.00-65.00.

South Central Kansas

Dairy alfalfa steady to .05/point higher, grass hay, grinding alfalfa and ground/delivered steady, alfalfa pellets steady to firm; movement slow. Alfalfa: horse, small squares 240.00-245.00. Dairy, .85-.90/point RFV. Supreme 155.00-165.00, Premium 150.00-160.00, Good 130.00-150.00. Stock cow alfalfa, 130.00-135.00 delivered. Fair/Good grinding alfalfa, 100.00-110.00 with an instance at 125.00-130.00. Ground and delivered locally to feedlots 130.00-140.00. The week of 11/26-12/02, 3,800T of grinding alfalfa and 738T of dairy alfalfa were delivered. Alfalfa pellets: Sun Cured 15 pct protein 160.00-170.00, 17 pct protein 165.00-175.00, Dehydrated 17 pct 207.00-217.00. Grass hay: bluestem, large rounds 65.00-70.00; Brome: large rounds 70.00-75.00, small squares 105.00-115.00. Sudan large rounds 80.00-90.00. Teff, small squares 6.25-

6.75 per bale, large squares 115.00-125.00 delivered, large rounds 65.00-75.00. Cornstalks: large rounds 55.00-60.00, cornstalks ground and delivered 60.00-70.00, Straw large squares 50.00-60.00, large rounds 50.00-55.00. Milo stalks 50.00-55.00.

Southeast Kansas

Dairy alfalfa .05/point higher, grass hay steady, grinding alfalfa and ground/delivered 10.00-15.00 higher; movement slow. Alfalfa: horse or goat, 210.00-220.00. Dairy .80-.90/point RFV. Stock cow alfalfa 100.00-110.00 with an instance at 125.00-135.00. Fair/Good grinding alfalfa 90.00-100.00. Ground and delivered, 105.00-115.00. Grass hay: bluestem, premium small squares 105.00-120.00. Good, mid and large squares 80.00-100.00, large rounds 60.00-70.00. Brome: small squares 6.00-8.00/bale. Good, mid and large squares 100.00-120.00, large rounds 75.00-85.00. Oat hay, large squares 120.00-130.00. Straw, mid squares 50.00-60.00.

Northwest Kansas

Dairy alfalfa and grinding alfalfa steady, ground/delivered 5.00 higher; movement slow. Alfalfa: small squares, 5.00-6.00/bale. Goat, 170.00-180.00. Dairy, Premium/Supreme .80-.95/point RFV. Stock cow, fair/good 85.00-95.00. Fair/good grinding alfalfa, 80.00-90.00. Ground and delivered locally to feedlots and dairies, 95.00-105.00.

North Central-Northeast Kansas

Dairy alfalfa, ground/delivered, and grass hay steady, grinding alfalfa 5.00-10.00 higher; movement slow. Alfalfa: horse, small squares 9.00-10.00/bale. Dairy .95-1.05/point RFV, Supreme 175.00-195.00, Premium 170.00-185.00, Good 150.00-170.00. Stock Cow, good 110.00-120.00. Fair/Good, grinding alfalfa, 100.00-110.00 with a couple of instances at 120.00. Ground and delivered, 115.00-125.00. Grass hay: bluestem, small squares 5.00-6.00/bale, large squares 90.00-100.00, large rounds 65.00-75.00. Brome: Good, small squares 6.00-7.00/bale delivered, mid and large squares, 100.00-110.00, good large rounds 75.00-80.00. Sudan large rounds 65.00-75.00; Milo Stalks: large rounds 40.00-55.00; Straw: small squares, 4.00-5.00/bale, large squares 75.00-85.00, large rounds 65.00-75.00.

***Prices are dollars per ton and FOB unless otherwise noted. Dairy alfalfa prices are for mid and large squares unless otherwise noted. Horse hay is in small squares unless otherwise noted. Prices are from the most recent sales.*

**CWF Certified Weed Free*

**RFV calculated using the Wis/Minn formula.*

***TDN calculated using the Western formula. Quantitative factors are approximate, and many factors can affect feeding value. Values based on 100% dry matter (TDN showing both 100% & 90%). Guidelines are to be used with visual appearance and intent of sale (usage).*

New I Am Angus to premiere on RFD-TV Christmas Day

We all come from somewhere. That includes Angus cattle and breeders. Premiering Christmas Day, *I Am Angus/Fabric of Our*

Forebears dives into the rich heritage of the Angus breed and the varied people who now raise Angus across the world. From the

original Aberdeen Angus herds in Scotland to the plains of South Dakota, down to the bayou and everywhere in between, the Angus story is told from eight breeders' perspectives in the latest film produced by American Angus Association®.

Join us on RFD-TV on Christmas Day and New Year's Day at 7 p.m. as they tell the stories of how the eight cattlemen and women from varied lineages are connected by a common thread, the heritage and legacy of the Angus breed. We learn about the origins of the Angus breed at Dunlouisie Angus and Ballindalloch Castle in Scotland before moving to the U.S. to the Biltmore Estate, Subiaco Abbey, Diamond Peak Cattle Company and 12 Star Angus, and then we hear from Salvador Galindo and Kelsey Ducheneaux about their Angus stories.

"We are excited to premiere our most comprehensive *I Am Angus* film to date with eight stories of those carrying on the long-standing Angus tradition," said Josh Comminellis, Association video production director. "As natives and immigrants, Angus cattle and their breeders have shaped the Association of today, and the *I Am Angus/*

Fabric of our Forebears honors that history."

The original description of the *I Am Angus* concept, initially developed by the Angus Media team in early 2010, was to produce "Personal portraits of the individuals responsible, directly or indirectly, for the production of Angus beef told across the mediums of film, photography and print."

Since the first segment premiered in October of the same year, the Association has released 36 complete films. Each film, broadcast on RFD TV and Angus TV, has garnered a following from thousands of cattle producers and consumers alike.

Telling the story of cattlemen and women, cattle feeders and beef industry icons give the rural community a voice in both the cinematography and printed journalism realms. Reaching thousands with each film and Angus Journal story, the *I Am Angus* productions allow the American Angus Association to broaden the reach of the Angus breed's role in the beef industry.

I Am Angus/Fabric of our Forebears also can be viewed after New Year's Day on angus.org and Angus TV on Vimeo and Youtube.

By Nicole Lane Erceg

The first Christmas my husband and I spent together, we didn't have a tree. We had just moved into our (tiny) apartment and the last thing we needed to spend money on was decorations. In an effort to make the moving boxes and new atmosphere cheery, we took a whiteboard we had on hand and drew ourselves a tree in red and green Expo markers. Not the same as a dolled-up spruce, but it

did the job.

Our Christmas morning was no less merry and bright than any I've had before. There were still a few gifts under our "tree" and we had a wonderful Christmas dinner. It was a meager start to our holidays together, but one I'll never forget.

We did the best we could with what we had, where we were.

Ranch life often requires this of us. Maybe it's using a piece of bal-

ing twine to hold "just for now," jotting down performance records on the back of a crumpled receipt, or pulling a cold, wet calf into the passenger seat of the pickup to warm them. Improvisation is necessary to make it work with what we have on hand, where we are.

Of course, we would all prefer not to have to improvise, to have everything we need on hand when we need it, and the resources to do all that we'd like to do. To have cattle that gain and grade and earn their keep and get better every year. That's the dream, right?

Business growth and upgrades only happen as time and the cattle markets allow. But when we cast a vision of where we want our herds to go, it's easy to decide when we need to improvise and when it's time to make those big investments.

Fifteen years ago, a carcass data sheet with 75% grading Choice was great.

Now, it's the average. When premium branded programs were developed, it was notable to get 30% of a commercial cattle load to reach those marbling levels. Again, that number today is widely accepted as something half the cattle are doing.

No one starts out with loads that grade 50% Prime. For cattlemen who've made it their goal to produce beef at the highest level, it impacts all parts of their business. It's the work that's done year in and year out, through drought and blizzard and market highs and lows. When the vision is clear, it's easy to see signals of where to invest (better genetics and health programs) and what sacrifices to make (separating wants from needs). And for those that have reached today's notable levels, a target of continued improvement can still increase profitability.

What does Christmas on the ranch look like for you

next year? Maybe you'll have better calving sheds or a calf crop on the way with improved genetics. This could be the year your cattle double the national average for Prime or the first year you decide to track down carcass data or try genomic testing.

More importantly, what sacrifices need to be made in the new year to make your production goals a reality? What greater discipline? It might be stricter heifer retention criteria or a deeper culling of the cow herd. It could mean delaying a wanted investment to prioritize a purchase that will more immediately help meet your goals. Which things are necessary, and which just make life a little more pleasant – like Christmas decorations?

No one brags about being average. If we want 2018 to be a better year than the last, this next year will require finding the balance between investing and improvising.

The decisions we make now determine what beef consumers will eat tomorrow.

While the whiteboard Christmas tree was a good substitute that first year, since then we've upgraded to a tree with lights and decorations. We had a vision of what our future holidays might be and we're slowly making that come to life. Decorations are just one of those things that make life a little more cheery, not a business more profitable, but this time of year is the perfect time to reflect and think about what the future holds.

Because whether you've been in the cattle business 40 years or four, sometimes we've all got to get a little scrappy to make our end goals of better beef a reality.

Next time in Black Ink® Miranda Reiman will look at how excellence can cut costs. Questions? E-mail nerceg@certifiedangusbeef.com.

Speakers announced for 21st annual Ag Tech Conference - January 18 & 19

More than 175 farmers, researchers, producers, and university folks will gather in Junction City for the 21st Annual Ag Tech Conference, hosted by KARTA and K-State Research and Extension. This event always draws a crowd because of its unique focus on the latest technology and cutting edge precision ag practices, but with a down-to-earth atmosphere and on-farm research results presented by other KARTA members who are experimenting on their farms.

A few of the keynote speakers have been finalized, with lots more exciting presentations to be announced soon.

Winterization: A must for farm equipment

By Jeri Geren, Diversified Agriculture and Natural Resources Agent, Wildcat District

With the harvest season coming to an end, and cold temperatures sneaking in, now is the time to start preparing your equipment to withstand the upcoming winter weather. Just like cattle growing their winter coats, or lining the north side of an old barn with square bales, farm equipment should also be pre-

pared to survive the freezing temperatures.

Start your winterization process by properly cleaning and servicing the equipment that is going to be stored. Remove dirt and debris from the outside and inside of the machine. A power washer can be used to clean the exterior, but be careful to avoid spraying the high-intensity water around seals. Do a regular service of the equipment by changing the oil,

cleaning or replacing air filters and checking the tire pressures. It is also critical to check the anti-freeze, lubricate bearings and joints and remove the battery, if possible, and store in a dry place.

The next step, but often the most procrastinated, is to repair any damage done to the machines during the previous growing season. Properly repairing machinery cuts back on rust and deterioration as well as lets you

get started promptly in the spring. Putting a fresh coat of paint on repaired areas will also help to cut down on corrosion.

One step that should never be forgotten is to clean out the equipment. For planters, drills, seeders and combines, that means removing any excess seeds and plant materials left in the bins or augers. For balers, any partial bales or remaining hay should be cleaned out to prevent rust and

decrease tension on the belts.

The final step, if it is an option for your operation, is to store the equipment in a shed. This is the most effective way to protect machinery from weathering. If building space is limited, the next best option is to securely cover the equipment with a water-resistant tarp.

Properly winterizing equipment will not only cut down on the headaches next year, but it will

also increase the life and resale value of the equipment in the future.

For more information, contact Jeri Geren, Diversified Agriculture and Natural Resources, jlsigle@ksu.edu, (620) 331-2690.

World Soil Day 2017: K-State distinguished professor speaks at United Nations celebration

Have you ever really thought about what lies beneath your feet? There are more living organisms in a mere tablespoon of soil than there are people on earth. Ninety-five percent of food is produced on our soils. Soil is a non-renewable natural resource in terms of the human life span as it takes as much as 1,000 years to form one inch of soil.

"Soil should be treated like royalty by all of us – protected and nourished. Soil is a finite natural resource, and cannot be replaced in our lifetime once it is lost to dust storms, water runoff, or pollution," said Gary Pierzynski, university distinguished professor and head of Kansas State University's Department of Agronomy. He was invited to speak at World Soil Day 2017.

"Caring for the planet starts from the ground" is the theme for World Soil Day 2017. Healthy soils are key to: mitigating and adapting to climate change, reducing forced migration, improving nutrition, preserving biodiversity, providing clean water, and achieving food security.

World Soil Day is held annually on Dec. 5 to bring attention to the importance of healthy soil and advocating for the sustainable management of soil resources. World Soil Day has been held every year since 2002, when the International Union of Soil Sciences made a resolution proposing its creation. In December 2013 the United Nations General Assembly designated Dec. 5, 2014 as the first official World Soil Day.

The World Soil Day celebration takes place at the U.N. Headquarters in New York City. The event is co-hosted by the Permanent Missions of Columbia, Lesotho, the Netherlands, and Thailand to the U.N., the Food and Agriculture

Organization of the United Nations, and the Secretariat of the U.N. Convention to Combat Desertification.

Pierzynski represented the FAO Intergovernmental Technical Panel on Soils at the celebration and announced the release of a report by the panel entitled "Global Assessment of the Impact of Plant Protection Products on Soil Functions and Soil

Ecosystems."

In addition, the first ever Global Soil Organic Carbon map will be launched. Soil organic carbon is the main component of soil organic matter and represents a crucial link to overall soil health. Poor land management and removal of natural vegetation has caused a dramatic decrease in global amounts of soil organic

carbon. Following the official release of these publications on Dec. 5, they will

be available for free at <http://www.fao.org/world-soil-day>.

REAL ESTATE AUCTION

FRIDAY, DECEMBER 22, 2017 — 10:00 AM
At Mayberry's, downtown — WASHINGTON, KANSAS
300 acres Charleston Township, Washington County, KS
Land in 3 Tracts + Home in Washington

TRACT 1
That land in the W ½ 7-2-4, lying **north** of Devil's Creek, except the farmstead area, containing 145 acres, more or less. There are 88 acres cropland, 37 acres native grass CRP, with the balance being timber, creek, and waterways. The cropland is about ¾ Muir soils and ¼ Hobbs soils, both prime bottom land soils. The FSA bases and yields are 8 acres wheat, 35 bushels; 36 acres corn, 78 bushels; 54 acres milo, 83 bushels. The estimated taxes are \$3,061. There are no growing crops.

TRACT 2
That land in the W ½ 7-2-4, lying **south** of Devil's Creek, containing 143 acres, more or less. This tract is native grass pasture, with about 25% of the pasture being well timbered land along Devil's Creek and in the draws on the north slopes. Along the creek there are two small CRP patches. The estimated taxes are \$521.

TRACT 3
12 acres, more or less, containing the farmstead area, with a 4 bedroom home, a 2 car garage, 2 machine sheds, 1 cattle shed, a good windbreak, and 3 acres bottomland cropland. There is rural water and electricity. The house has always been occupied. The estimated taxes are \$810. **To see the house, please call Bott Realty & Auction, 325-2734, for an appointment.**

Tracts 1 and 2 will be offered separately and together and will be sold in the manner that brings the most money. Then Tract 3 (the farmstead) will be offered and sold separately.

This offering provides excellent cropland and CRP rental income on Tract 1; good grazing potential on Tract 2; a very nice country residential setting on Tract 3, and great wildlife habitat on the entire 300 acres. The northwest corner of this ½ section is the intersection of Rainbow Road and 23rd Road, 5 miles north and 1 mile east of Washington.

TRACT 4
Home at 211 West 4th Street in Washington. This is a nicely kept, 2 bedroom, 1 bathroom ranch style home, with a full basement, attached garage, and central heat and AC. The lot is 49x165. The 2017 taxes are \$937.50. **To see the house, call Bott Realty & Auction, 325-2734 for an appointment, or come to an Open House on Monday evening, December 11th, from 5:00 to 6:30, or on Saturday evening, December 16th, from 5:30 to 6:30.**

Terms on all tracts: Ten (10) percent down, the balance due in 30 days. Possession given at closing.

THE HEIRS OF ETHEL C. PETERS

Announcements the day of the auction take precedence over previous advertising.

Nine celebrate 50 years of KLA membership

Nine Kansas Livestock Association (KLA) members celebrating their golden anniversaries with the organization this year were recognized during the KLA Convention November 29. KLA currently has 104 members who have been loyal to the association a half century or longer.

Those who joined KLA in 1967 were Roger Caudle, Atchison; Farmers & Ranchers Livestock, Salina; Dennis Huck, Coldwater; Larson Farm LLC, Green; Musil Farms, Blue Rapids; Philip Phar, Council Grove; Security State Bank, Scott City; Arlan Stakley, El Dorado; and John Swayze, Bucklin.

Attaining 60 years of membership this year is First National Bank at Scott City. Pat Sauble of Cedar Point was honored for reaching the 70-year mark. The longest continuously held KLA membership belongs to Jansonius Farm of Prairie View, which joined the association in 1918.

"The endless support given by these members to the industry and the association makes KLA an effective voice in protecting the business interests of Kansas producers," said KLA president-elect Lee Reeve, a cattle feeder and farmer from Garden City.

KLA scholarship winners were, back row, from left: Cole Renner, Norton; Brandi Feehan, Louisville; Ashlea Baalman, Wichita; Grace Luebke, Marysville; John Kennedy, Soldier; David Luebke, Marysville; Sarah Loomis, Council Grove; Taylor DeWeese, Pratt; Leah Parsons, Leavenworth; (front row, L to R) Kyle Pakkebie, Lenora; Morgan Woodbury, Quenemo; Taylor Ochs, Jetmore; Kassady Griffin, Strong City; Rachel Bellar, Howard; Sarah Moyer, Emporia; Katilin Houck, Americus; Zack Callaghan, Tonganoxie and Wade Niermeier, Hoxie. (Not pictured are Megan Davis, Princeton; Haley DeLong, Emporia; Quentin Haas, Madison; and Chisum Grund, Wallace.)

Kansas youth receive \$23,000 in scholarships

Twenty-two scholarship winners for the 2017-18 school year were recognized during the annual Kansas Livestock Association (KLA) Convention November 29 in Wichita. A total of \$23,000 was presented by the Kansas Livestock Foundation (KLF) and its partners.

Haley DeLong of Emporia received a \$1,500 Ralgro Wheels for Bucks (WFB) scholarship from Merck Animal Health and KLF. DeLong is the daughter of Dale and Bobbie DeLong. She is a third-year veterinary student at Kansas State University. This award recognizes K-State veterinary school students with a career goal of being a large animal veterinarian.

Five Kansas students each have been awarded, through KLF, \$1,000 Wheels for Bucks Scholarships. Brandi Feehan is the daughter of Thomas and Vicki Feehan from Louisburg. She is a senior at K-State majoring in animal science. Kaitlin Houck, daughter of Jeff and Lori Houck from Americus, is a sophomore at K-State majoring in animal science. John Kennedy is the son of Kelly and Kim Kennedy of Soldier. He is a freshman majoring in agricultural education at K-State. Grace Luebke is the daughter of John and Diane Luebke from Marysville. She is a sophomore at K-State majoring in pre-veterinary medicine. Cole Renner, son of Craig and Cheri Renner of Norton, is a senior majoring in agronomy and animal science at K-State. This scholarship is presented to students entering or returning to a Kansas community or senior college in agriculture or a related field. WFB scholarships were funded by Merck's donation of \$1.00 for each used Ralgro wheel turned in to KLA. Beginning in 2017, both Ralgro wheels and Revalor cartridges are being accepted to fund the new Merck Cartridges for Cash scholarship program.

Rachel Bellar of Howard has been awarded the \$1,000 Cattlemen's Scholarship from GoBob Pipe & Steel and KLF. Bellar is the daughter of Mike and Peggy Bellar. She is a sophomore at K-State majoring in agricultural education and agronomy. This scholarship is awarded to a student entering or returning to a Kansas community or senior college and pursu-

ing a degree in agriculture or a related field.

Two K-State students each received a \$1,500 Douglas A. Laue Memorial Scholarship. David Luebke is the son of John and Diane Luebke from Marysville. He is a junior majoring in agricultural economics and agronomy. Kyle Pakkebie, son of Harvey and Sandra Pakkebie from Lenora, is a senior majoring in animal science. This scholarship is awarded to a student entering their junior or senior year at K-State or Fort Hays State University and pursuing a degree in agriculture.

Four \$1,000 Hampel Oil Scholarships have been presented to Kansas students. Quentin Haas, son of Kane and Jolene Haas from Madison, is a junior majoring in animal science at K-State. Wade Niermeier is the son of Fred and Nancy Niermeier of Hoxie. He is a junior at Fort Hays State University majoring in agriculture. Taylor Ochs, daughter of Steve and Stephanie Ochs, is a junior majoring in agribusiness at K-State. Leah Parsons is the daughter of Rodney and Amy Parsons from Leavenworth. She is a junior at K-State majoring in agronomy. This scholarship is awarded to students entering their junior or senior year at K-State or Fort Hays State University and pursuing a degree in agronomy, agribusiness or ag economics. Preference is given to applicants with a career goal of being actively engaged in a farming or feedyard enterprise.

Four students from across the state have received \$1,000 "Youth in Agriculture" scholarships from KLF. Zachary Callaghan is the son of John and Sheila Callaghan from Tonganoxie. He is a sophomore at K-State majoring in agricultural education. Chisum Grund of Wallace is the son of Jerry and Chrysanne Grund. He is a freshman attending Hutchinson Community College (HCC) and majoring in ag technology management. Sarah Loomis, daughter of Jason and Sheryl Loomis from Council Grove, is a freshman at HCC majoring in agricultural communications and animal science. Sarah Moyer is the daughter of Jaret and Shawna Moyer of Emporia. She is a junior at K-State majoring in agricultural communications. Funded by the KLF Club

Calf Sale held during the Kansas Junior Livestock Show, these scholarships recognize students entering or returning to a Kansas junior or senior college and pursuing a degree in agriculture or a related field.

The Kansas Cattle-Women (KCW) awarded four \$1,000 scholarships to K-State students. Ashlea Baalman is the daughter of Tom and Tara Baalman of Wichita. She is a junior majoring in animal science. Taylor DeWeese, the daughter of Jerry and Anita DeWeese, is a senior majoring in food science. Kassady Griffin is the daughter of Justin and Katrina Griffin from Strong City. She is a freshman majoring in family and consumer sciences. Morgan Woodbury, daughter of Howard and Elise Woodbury of Quenemo, is a freshman majoring in agribusiness. This scholarship, funded by the KCW silent auction, is awarded to students entering or returning to a Kansas community or senior college and pursuing a degree in dietetics, food safety, agriculture or a related field.

Megan Davis was awarded the \$500 Fred H. Woodbury Memorial Scholarship through KLF. Davis is the daughter of Jack and Lisa Davis of Princeton. She is a freshman at HCC majoring in pre-veterinary medicine. This scholarship is presented to a student attending a Kansas junior or senior college and pursuing a degree in agriculture. Preference is given to students residing within Chase, Franklin, Lyon, Osage or Wabaunsee county.

ASI student teams win national recognition

Kansas State University's Animal Sciences and Industry competition teams have excelled during their 2017 seasons. KSU ASI students were named the 2017 National Champion Meat Animal Evaluation Team, 2017 World Champion Horse Judging Team, 2017 Reserve National Champion Meat Judging Team, 2017 Reserve National Champion Livestock Judging Team and the 2017 Reserve National Champion Animal Science Academic Quadrathlon Team.

"We are proud of our students and coaches for their hard work and accomplishments," says Ken Odde, K-State ASI department head. "Participating on a collegiate competition team requires a lot of dedication and commitment. These students not only excelled in their respective competitions throughout the year but they continued to keep a focus on their academics as well."

Six students were awarded the title of "All-American" to honor their judging careers. The All-American award is based on the individual's judging excellence, academic skill, community service and industry leadership. All-American honorees from the livestock judging team include: Chase Gleason, Uniontown; Callahan Grund, Wallace; Brooke Jensen, Courtland and Leah Scholz, Lancaster. Eric Koehlmoos, Granville, Iowa, was named to the meat judging First Team All-American and teammate Jayne Bannister, Kent, New York, was awarded Second Team All-American honors.

The KSU Horse Judging Team claimed the title of the 2017 World Champion Senior Team on Sunday, November 12, at the AQHA World Championship Show in Oklahoma

City, Oklahoma. Cameron Hayden, ASI junior, was high individual overall, and the team secured the first-place spot in both performance and reasons and they finished second in halter. The Horse Judging Team is coached by Dr. James Lattimer and assistants Katherine Jordan and Rachel Sorensen.

The K-State Livestock Judging Team ended its season winning Reserve National Champion honors in Louisville, Kentucky, at the 112th National Collegiate Livestock Judging Contest hosted as part of the North American International Livestock Exposition. Two team members placed in the top ten — Brooke Jensen, Courtland, was sixth overall, and Matt Marion, West Terre Haute, Indiana, was ninth overall. The Livestock Judging Team is coached by Chris Mullinix and assistant Spencer Scotten.

The K-State Meats Judging Team finished their season as the Reserve National Champions International Meat Judging Contest in Dakota City, Nebraska, on November 12. The team was second in beef grading, overall beef, pork and total placing. They were fourth in beef judging, lamb judging and reasons. The team finished fifth in specification. Koehlmoos was the third overall high individual. The K-State Meats Judging Team is coached by Dr.

Terry Houser and graduate students Allie Hobson and Lane Giess.

The Kansas State Meat Animal Evaluation Team won the national champion title at the 2017 Collegiate Meat Animal Evaluation Contest in April. The team won the market animal, breeding and communication divisions. Three K-State team members placed in the overall top five. Chase Gleason, Uniontown, was the high individual. Shelby Teague, Fort Morgan, Colorado, placed third overall and Brooke Jensen, Courtland, was fourth overall. The team was coached by Dr. Travis O'Quinn and Chris Mullinix and assisted by graduate students Austin Langemeier and Lauren Prill.

The National Animal Science Academic Quadrathlon was hosted at the University of Maryland — College Park, near Baltimore, July 8-12. At this contest, the team from Kansas State University was named Reserve National Champion due to winning Quiz Bowl, placing second in Laboratory Practicum, placing third in the Oral Presentation and fourth in Written Exam. The team consisted of Jenna Chance, Lebanon, Indiana; Cameron Hayden, Cassopolis, Michigan; Taylor Ochsner, Andover; and MaRyka Smith, Hoyt. The Quadrathlon team is coached by Dr. Karol Fike.

Exploring a world without food animals – topic of USDA and Virginia Tech research

What would happen if U.S. farmers stopped producing animals for food and Americans went vegan? Some have called for a move in that direction to address increasing concerns about U.S. health, eating habits, and climate change. Research-

ers at USDA's Agricultural Research Service (ARS) and Virginia Tech recently explored those questions and found surprising results.

Mary Beth Hall, an ARS animal scientist at the U.S. Dairy Forage Research Center in Mad-

ison, Wis., and Robin R. White, a professor of Animal and Poultry Science at Virginia Tech in Blacksburg, Va., found that shifting land usage from food animal production to food crop production would increase the total U.S. food supply by 23 percent. Because much of that land is unsuitable for high value crops, most of the additional food produced would include high-calorie crops like corn and soybeans.

A complete shift away from food animal production would present major challenges to meeting America's nutritional needs. With no meat, milk, eggs, fish, or cheese in our diets, the U.S. population would not receive enough of several different essential dietary nutrients from the foods they eat, according to the study results.

The findings are based on information compiled in the USDA dietary guidelines.

"Different types of carefully balanced diets — vegan, vegetarian, omnivore — can meet a person's needs and keep them healthy, but this study examined balancing the needs of the entire nation with the foods we could produce from plants alone. There's a difference between what's possible when feeding one person versus feeding everyone in the U.S.," says Hall.

Eliminating food animals would increase deficiencies in calcium, vitamins A and B12 and some important fatty acids. The last are important as they help to reduce cardiovascular disease and improve cognitive function and vision in infants. Animal food products are the only

available, non-supplemental sources of some fatty acids and vitamin B12.

A plant-only diet also would require individuals to eat more food and more daily calories to meet their nutritional needs from the foods they eat because the available foods from plants are not as nutrient-dense as foods from animals.

Agriculture in the U.S. contributed to approximately 9 percent of the nation's total greenhouse gas emissions in 2015, with nearly half of that total coming from animal production, according to Environmental Protection Agency reports. The scientists determined that eliminating food animals from U.S. production would reduce greenhouse gas emissions, but not by the full 49 percent of agricul-

tural emissions that animals currently contribute. Rather, greenhouse gas emissions from agriculture would drop by 28 percent without farmed animals because of increases associated with producing additional food crops and the use of more synthetic fertilizer to replace manure. That would represent a drop of only about 2.6 percent of total U.S. emissions.

"A take-home message from the study was that we need to expand the way we think about food production to account for the complex consequences of changing any individual piece within the wider food system," says White.

The findings were published in *Proceedings of the National Academy of Science*.

Kuhn introduces VB 3100 Series Round Balers

Kuhn is offering a new generation of round balers enabling you to meet the challenges of tomorrow with simple, yet reliable designs. The VB 3100 Series offers a wide range of variable chamber round balers to match your individual needs.

The VB 3155-3185 balers are ideal for the baling of dry materials such as cornstalks and hay, but can also handle alfalfa and some silage. The VB 3160-3190 premium, all-around balers, are Isobus balers designed for a wide range of forage materials, including silage. The VB 3165-3195, premium XD balers, are designed to work in the heaviest conditions across the world and are also available as baler-wrapper combinations (VBP 3165). Higher bale pressure settings on the VB 3165-3195 can provide up to 10% more bale weight in drier crops.

The wide, hybrid pickup on all Kuhn VB balers provides maximum ground adaptation during baling. The pendulum capabilities of the pickup keep the pickup wheels in constant contact with the field surface providing more stability in all swaths. With their patented Integral Rotor technology, an enormous throughput capacity is guaranteed at all times and you to better meet your operation's specific needs, there are four different intake options available on the Kuhn VB 3100 round balers. Select from an OptiFlow open throat intake design, an OptiFeed non-cutting rotor, or a 14- or 23-knife OptiCut integral rotor. All cutter models also have Group Selection and Drop Floor technology.

The VB 3155-3185 feature a new Kuhn VT 30 color monitor, whereas the premium models are fully ISOBUS machines. For more details, visit www.KuhnNorthAmerica.com.

Spring Calving Cows Need Key Breeder Mineral!
Calf health & growth begins with cow nutrition:
The development of offspring is affected by a cow's nutrition even before the moment of conception.
Research shows that optimal trace mineral nutrition positively affects embryo & fetal development, which in turn results in improved calf growth performance.
Heavier calves when leaving the herd:
Beef cow diets supplemented with Availa-4 during the last 95 days of gestation were shown to increase herd productivity.

To Train a Cow Horse Part II

Basic horse training was accomplished in Part I. Now, we've got to move on and start teaching advanced body movements to your colt that will enable him to work cattle with efficient moves to prevent him from missing a cut or losing a cow back to the herd.

All the parts have to come into play and that means you will start directing different parts of his body to move with your leg, rein or body movements. We have to develop the perfect turn for the colt and that starts with his front end. Ideally, you want the horse to rock back on his haunches and turn. You don't want a barrel horse turn (a round turn) or the cow will beat him every time and be long gone before the horse gets turned around.

So, we start with the outside front leg stepping over and in front of the inside leg. If you're turning to the left, the horse should sit back slightly, swing his right front leg to the left in front of his left front leg and use his outside hind leg to pivot as he makes the turn. That is the fastest way for a horse to make a turn to block or turn a cow. If the outside front leg swings behind the inside front leg, his outside leg is blocked by his body and cannot move very far. It is blocked from

reaching across into the turn. It is imperative to develop a turn where the outside leg sweeps across in front of the inside leg. Inside front leg means the leg on the cow side.

Some colts turn this way naturally but most of them have to be conditioned to cross over in front of the inside leg. Walk in circles and, using two hands on the reins, apply outside rein pressure and bump your outside boot heel in his girth or even shoulder to tighten the circle until he is forced to cross over to tighten the turn one step at a time. If he crosses behind the inside leg don't despair or scold him for doing wrong. Try again and the first time he gets it right reward him with a pat or two and give him a short breather. Try to get in his head that he did the right thing. This maneuver takes time to get it right. Only practice a little each day. Don't pound on the horse and demand perfection immediately. It may take weeks or months to get the horse to consistently cross over correctly. Once you get one correct step then try for two and progress from there until you can get a correct 180-degree turn.

This same maneuver is the way reiners begin training a horse for a turn-around or spin except they use the inside hind leg to

pivot on in order to spin in a complete circle. If you watch a reining horse spin, you will see how incredibly fast the horse is capable of turning by crossing over in the front and pivoting on his inside hind leg.

Once he is making smooth turns using his front end to pivot around his hindquarters you can practice roll-backs against the fence or wall of a round pen, corral or arena. Lope him around the pen and approach the fence at a 45 degree angle. Stop him deep and ask him to roll back towards the fence and move out in the opposite direction with a smooth turn. Lope out of the turn around the pen to the other side and stop and roll-back again in the opposite direction. Get a full stop first before initiating the turn. A full stop is the most important part of a good turn. Stop first and then turn. If you allow your horse to start turning before he comes to a full stop, you will be teaching a bad habit that will cause the horse to circle around to turn (a barrel horse turn) instead of rolling back.

Work on these turns and roll-backs a little each day. Perfect one thing before moving on to another. Give the horse mental relaxation between maneuvers by allowing him to catch his breath and unwind a bit so he has time to think about what you are teaching and what he has learned. When both of you are comfortable with his

turns, you can step up to training aids that will help perfect the stop and turn.

A mechanical cow or a flag that runs back and forth is a good way to prepare a young horse for working cattle. You can teach him to move when the flag moves and stop when the flag stops. You can even use a person running on the ground to simulate a cow.

One trainer I know claims he even uses chickens but I don't know how he communicates with them to tell them which way to run. We'll use a flag and leave the chickens in the coop.

Guide your horse to turn with the flag using his front end and pivoting around his hindquarters as you have taught him. Stop him parallel with the flag. Ease back on the reins to get his weight on the hindquarters and as the flag moves in the opposite direction, tip his nose toward the moving flag and ask for that good front-end turn. Be sure to get the horse in good position with the weight on his hind end before asking for the turn. Lope down with the flag staying near the center of the flag. When the flag stops, sit down in the saddle, push on the horn and add a little weight to the stirrups and signal a stop with the reins. You might even say "whoa."

The stop on your part is all one movement. Slump your shoulders straight down (known as the cutter's slump) sitting deep in the

saddle on your back pockets, place more weight in the stirrups with your legs slightly forward, push on the saddle horn and place back pressure on the reins. That seems like a lot of moves to get a good stop—and it is— but it works. Practice that stop by just loping around the pen and stopping to get the feel. It takes time to get it right and the more you practice the better you will get and the horse will learn to read your body language and his stops will improve.

Mechanical devices are basic training and they give you a chance to train a horse the right way to turn, stop and move when the flag moves. When the horse is following the flag, stopping when it stops and correctly turning when it turns, you can begin working live cattle. Start out with one cow and just follow the cow around the pen. Let the horse just track the cow. When the cow stops, stop the horse. If the cow turns, turn the horse to follow. When you feel the horse starting to respond to the cow's stops and turns without your help, then test him and see if he'll work the cow on his own. Drop the reins and give him a chance to use his own mind to work the cow. If he flubs a move, use

the cues to place him back on the cow. Practice makes perfect and it doesn't take long for a good horse to begin making his own decisions and relying less and less on your cues.

A big part of this training is for you to read the cow and use your body language to help the horse do his job. Use your body cues when an ear flicks or a leg threatens an imminent move, Lean forward to cue the horse to accelerate after a departing cow. Set down when the cow indicates it's going to stop. These subtle moves on your part strengthens the horse's confidence when he makes the right move with the cow. I've touched on the mechanics of the moves a horse has to make to work cows well. The rider has to develop these traits in his horse in stages. It takes time and experience for the horse to mature and become proficient at his trade. Buster Welch once said, "Not all at once" when asked about training a cow horse.

Good cow horses are like fine wine. They get better with age. Contact Ralph Galeano at horseman@horsemanspress.com or www.horsemanspress.com.

Cattle Sale Every Thursday 11:00 AM

By John Forshee,
District Extension
Director, River Valley
District #4

Your local K-State Re-
search and Extension of-
fice is a great resource for
a variety of information re-
lated to our four program
areas of Agriculture, 4-H
and Youth Development,
Family and Consumer
Sciences, and Community
Development and Vitality.
This week I want to high-
light a couple of updated

resources that are avail-
able and important to our
rural and ag communities.

The Kansas Depart-
ment of Agriculture pro-
vides an interactive map
of Kansas, showing the
economic impact of agri-
culture broken down by
county. The map, located
on the KDA website, has
recently been updated to
provide citizens with sta-
tistics adjusted for 2017.
It can be used to find the

agricultural economic
facts for each of the 105
counties in Kansas. KDA
annually updates the sta-
tistics on the map to give
the state's driving econom-
ic industry the recognition
it deserves.

In the 65 sectors of
Kansas agriculture that
were recognized for this
data compilation, the total
economic output is near-
ly \$68 billion. Agriculture
also supports more than
246,000 jobs statewide.

The interactive map al-
lows users to see detailed
agricultural statistics in-
cluding farm numbers,
leading agricultural sec-
tors and value-added data
for each county. KDA uti-
lizes data compiled by the
U.S. Department of Agri-
culture's National Agricul-
tural Statistics Service.

The economic im-
pact data is sourced
from the most recent IM-
PLAN data available.
The county statistics map

Tax Guides are available
at any K-State Research
and Extension, River
Valley District Office.
Look for these and a va-
riety of other resources
at your Extension offices
located in Belleville, Clay
Center, Concordia, and
Washington. Look for us
online at [http://www.river-
valley.k-state.edu/](http://www.river-valley.k-state.edu/) or find
us on Facebook at www.facebook.com/RVED4 or
[www.facebook.com/River-
Valley4H/](http://www.facebook.com/River-Valley4H/)
