

Schwieterman Market Outlook

A marketing commentary by Bret Crotts

The grain markets didn't feel particularly strong last week, but the corn, wheat, and soybeans all closed higher for the week. There were several factors at work for the bull camp, such as solid demand for soybeans and wheat, and

problematic weather in much of the U.S. Trade news has waffled back and forth from bullish to bearish from day to day, which seems normal, and it still seems unlikely that we will actually have a "Phase 1," or any other phase, of a trade

deal signed any time soon.

With all the weather issues we have seen for the past several months it just doesn't seem likely that U.S. corn yields can stay so close to trend, but we will find out what USDA thinks on Friday

when we get the November supply and demand report. Soybean yields ought to be suffering as well, so another cut to the bean yield seems likely. Harvest progress is well behind normal, so perhaps there isn't enough data for USDA to work with. In 1993 USDA didn't get acreage and yield sorted out until January, so we may have more waiting to do.

On the charts, the December corn posted an outside day higher Tuesday, and then saw strong follow through buying Wednesday. The overbought condition of the market was been relieved and we should be set for another leg higher. The \$4.25 area remains the next upside objective for the time being.

The December KW tested some very important trend line support Thursday, which ended up holding, and the market made a nice bounce off of the support. The wheat ended up posting a strong close Friday, which took out the prior five session's highs. The top end of the upward trading channel will come in at the \$4.45 area next week, but long term a move up to \$4.70 is in the works. There won't be any market moving data from USDA to work with, so some strength in the corn would be a huge help to the bulls.

Soybeans were basically the weak link of the bunch, but still managed the higher

close for the week thanks to Friday's gains. Thursday's test of the 38% retracement was a key development for the week, and that should support area should end up marking the starting point of the next leg up. The next upside objective for the January contract will be the \$9.80 area.

Cattle futures had a great week. The post Tyson-fire march higher continued and we got more multi-month highs. The December live cattle are now within about \$4.50 of the contract high. Other than the fact that technical indicators are overbought, there isn't much that is negative about this market. At some point we will see a correction, but one should be very careful trying to pick a top. If the boxed beef is at multi-year highs, why can't the live cattle also be at multi-year highs?

The feeder cattle were strong as well. The November feeders reached the 62% retracement of the move down that began back in May. This is a good spot for a pause, but that will only happen if the live cattle make a pause as well. For the time being one should look at a \$3-\$5 pull back in the feeders as a buying opportunity.

Kansas Hay Market Report

Hay market trade was slow, demand was slow to moderate, and prices remain steady. Nothing new going on, all is steady as she goes. Most producers are still reporting hay movement as slow, as harvest is keeping then busy. Cattle are starting to move to pens so inquiries have picked up a bit. Abnormally dry (D0) conditions are at 13 pct, moderate drought (D1) conditions are at 7.5 pct. and severe drought (D2) conditions are at 6 pct. If you have any extra hay to sell and/or need hay here in Kansas, use the services of the Internet Hay Exchange: www.hayexchange.com/ks.php.

Southwest Kansas

Dairy alfalfa, grinding alfalfa and ground/delivered steady; movement slow. Alfalfa: horse, premium small squares 230.00-240.00. Dairy 1.00-1.05/point RFV, Supreme 185.00-226.00, Premium 170.00-195.00, Good 160.00-170.00. Stock or Dry Cow 160.00-170.00. Fair/Good grinding alfalfa, 115.00-125.00. Ground and delivered locally to feedlots and dairies, 150.00-160.00. Grass Hay: Bluestem premium small squares 140.00-150.00. Oat hay: none reported. Sudan: None reported. Wheat straw: large rounds 40.00-50.00, large squares 65.00-75.00 delivered. The week of 10/20-10/26, 8,078/T of grinding alfalfa and 728T of dairy alfalfa was reported bought/sold.

South Central Kansas

Dairy alfalfa, steady, alfalfa pellets, grinding alfalfa, ground/delivered steady; movement slow. Alfalfa: horse, small squares 200.00-210.00. Dairy, 1.00-1.05/point RFV, Supreme 195.00-

225.00, Premium 175.00-200.00, Good 165.00-175.00. Stock cow, 130.00-150.00. Fair/Good grinding alfalfa, 90.00-100.00. Ground and delivered locally to feedlots 135.00-145.00; Alfalfa pellets: Sun cured 15 pct protein 200.00-205.00, 17 pct protein 210.00-220.00, Dehydrated 17 pct 300.00-310.00; Teff hay, mid squares 155.00-165.00. Grass Hay: Bluestem, good small squares 7.00-8.00/bale, large rounds 70.00-80.00. Brome, small squares 7.00-8.00/bale, large rounds 100.00-110.00, lesser quality 70.00-80.00. Sudan: large rounds 65.00-75.00 delivered. Oat hay, large rounds 70.00-85.00. Wheat Straw: small squares 5.50-6.50/bale, large squares 70.00-75.00, large rounds 55.00-65.00. The week of 10/20-10/26, 6,362T of grinding alfalfa and 1328T of dairy alfalfa was reported bought/sold.

Farm Succession and Tax Control program planned for Nov. 21

On Thursday, November 21st from 6 p.m. to 8 p.m., K-State Research and Extension Wildcat District will host

Farm Succession and Tax Control at the Southeast Extension Center in Parsons.

The average age of the

American farmer is 57.5 years, yet still, many do not have any plans lined out for their farms after they are retired or gone. Not having a will or trust can create a lot of problems later on, but many people do not know how to get started on creating one. The Farm Succession and Tax Control program will cover the details of creating wills and trusts, dealing with the legal issues of estate planning, and also controlling taxes in the meantime. Come get the information you need so you can talk with your family about farm inheritance plans during the Thanksgiving holiday. Much of the information covered will be useful for any asset owners with interests in wills, trusts, and estate planning, not just for those with farms.

Join them on November 21st from 6 p.m. to 8 p.m. at the Southeast Extension Center in Parsons (25092 Ness Rd, Parsons). Cost is just \$5 and payable at the door. Dinner will be served during the program. Please call 620-724-8233 to let them know you are coming.

This program is graciously sponsored by: Community National Bank and Trust

For more information, please contact James Coover, Crop Production Agent, jcoover@ksu.edu or (620) 724-8233.

KDA selects 2019 Specialty Crop Block Grant projects

The Kansas Department of Agriculture has been awarded \$373,525.24 through the Specialty Crop Block Grant Program. Funds for the program are presented by the U.S. Department of Agriculture Ag-

ricultural Marketing Service to increase opportunities for specialty crops. According to the USDA, specialty crops are defined as “fruits, vegetables, tree nuts, dried fruits, horticulture and nursery crops,

including floriculture.” KDA has selected other recipients to further utilize the funds.

“We have a wide variety of specialty crops grown in Kansas, and these awards will help provide resources to producers that can enhance their individual growing operations,” said Secretary of Agriculture Mike Beam. “The specialty crop sector has a bright future in our state, and we celebrate these recipients.”

The following is a list of Kansas projects that will be funded by the grant:

Kansas State University: Improving the Yield, Quality, and Economic Potential of Strawberries Growing Under High Tunnels in Kansas, \$67,990.32 — The project will study the economic potential of growing day-neutral strawberries under high tunnel in comparison to high tunnel tomato production.

Johnson County Extension Council: Enhancing Density Apple Production in Eastern Kansas with Drape Netting, \$35,084.36 — The council will partner with local tree fruit producers to research and provide education on high density apple production systems and the adoption of drape

netting management practices.

Kansas State University: Novel and Sustainable Wash-Water Systems for Improving the Safety and Quality of Leafy Greens, \$54,174.96 — A team will collaborate with growers to implement cost-effective and sustainable antimicrobial wash-water systems to increase the safety, shelf-life, and competitiveness of leafy greens.

Kansas State University: GAPs Certification Funding and Produce Safety Outreach for Kansas Growers, \$57,875.04 — This project will also assist in improving the safety of Kansas fruits and vegetables and assist producers to receive GAP (Good Agricultural Practices) certification.

Douglas County Research and Extension: Enhancing Beginning Farmer Training and Market Access in Northeast Kansas, \$44,739.00 — A collaboration will work on a long-term Sustainability Action Plan for an improved beginning specialty crop farmer training program, including a series of hands-on workshops for beginning producers.

Kansas Department of Agriculture: Specialty Crop Con-

CoBank quarterly economic review: volatility continues to roil U.S. agricultural markets

Uncertainty over trade policy, weather and African Swine Fever dominated agricultural markets last quarter, causing greater volatility across the industry that’s affecting pro-

ducers, supply chains and end users, according to the latest Quarterly Rural Economic Review from the CoBank Knowledge Exchange division.

Trade negotiation breakthroughs have largely remained elusive and the U.S. agricultural sector is preparing for its second consecutive harvest under the shadow of hefty tariffs. Lower feed prices, however, are aiding animal protein and dairy margins.

“Global trade tensions are ratcheting up as world economic growth slows,” said Dan Kowalski, vice president of the Knowledge Exchange division at CoBank. “However, the new trade deal struck between the U.S. and Japan is a bright spot and will bolster U.S. agriculture’s competitiveness into a key export destination.”

The historically late planting of the corn crop cast a long shadow through the quarter with extremely volatile cash

ference Education Support, \$25,500.00 —Kansas specialty crop growers will receive assistance to attend a conference on specialty crop growing techniques to increase their knowledge base, to help develop a plan of action for their operations.

Kansas State University: Identifying Best Management Practices for Upright Dry Bean Production, \$38,223.36 — Research will establish best management practices for upright dry edible beans, evaluate management questions, and communicate findings to current and potential future dry bean growers.

Greater Northwest Kansas Community Foundation: Increasing Regional Vegetable Production and Distribution Capacity for Western Kansas, \$42,250.00 — A local collaborative group will assist producers in Northwest Kansas scale up vegetable production and prepare to deliver to local grocery markets.

For more information about the Specialty Crop Block Grant Program including more detail about these grant projects, visit agriculture.ks.gov/specialtycrop.

ANNUAL BULL SALE

SATURDAY, NOV. 23, 2019
12:30 PM. NW OF EUREKA, KS

150 BULLS TO SELL | Over half are coming 2's!

Kansas Forest Service to host statewide trainings

The Kansas Forest Service is offering day-long community forestry trainings across the state in November to address tree issues facing by Kansas communities.

KFS officials note that properly caring for trees in the urban environment has become an increasingly difficult task for city foresters, city staff, tree boards and other green industry professionals.

Training topics include the environmental impacts of drought, windstorm events and other environmental factors and the potential problems that may negatively affect community trees. Attendees will learn how tree defects can make a tree hazardous and a candidate for removal.

The agenda includes an indoor discussion of tree assessment, removal, proper pruning and storm damage pruning; and an outdoor pruning demonstration.

Dates and locations include:

Tuesday, Nov. 5 - Emporia

Tuesday, Nov. 5 - Hays

Thursday, Nov. 7 - Marysville

Thursday, Nov. 14 - Olathe

Tuesday, Nov. 19 - Park City

Thursday, Nov. 21 - Parsons Arboretum

Registration is required and currently open at <https://communityforestrytraining.eventbrite.com>. The registration fee is \$5.

For more information, contact your district community forester.

Cargill and FFA

Cargill and the National FFA organization share the belief that agriculture can solve some of the world's toughest sustainability challenges. Cargill is investing \$2.1 million over three years to help the FFA organization develop future leaders who are prepared to continue advancing sustainable agriculture. The funds will enable the FFA Organization's efforts to bridge the needs of the agriculture, food and natural resources industries.

"We need the best and brightest young minds to help create solutions that balance feeding a growing population with protecting our planet," said Ruth Kimmelshue, business operations & supply chain lead and chief sustainability officer for Cargill, and former member of the National FFA Organization Board of Directors. "Through agriculture, young people have the opportunity to develop and use new technology and implement solutions to regenerate soils, build the economic success of farming communities, innovate supply chains, address the global issues

Markets, alternative meats on KLA Convention program

Featured presentations about the cattle markets, how the industry is using its resources to position beef as the optimal choice over plant proteins and the continual progress being made on beef sustainability will highlight the educational program at the Kansas Livestock Association (KLA) Convention. The three-day event will be held December 4-6 at the Wichita Hyatt and Century II Convention Center.

CattleFax Chief Executive Officer Randy Blach will offer perspective on the cattle and beef markets during Beef Industry University (BIU), sponsored by the Farm Credit Associations of Kansas. As the industry waits for one of the largest beef processing facilities, the Tyson plant in Holcomb, to come back on-line after the fire in early August, Blach will discuss packing ca-

Pair of 110 gal. fiberglass saddle tanks w/ frame; Antique flip over 2-row stock cutter; Old tumble bug; JD 4-wheel running gear; 1100 gal. poly water tank; 300 gal. fuel barrel w/ stand; 18.4x38 and 16.9x34 clamp-on duals; 4 Hesston heads.

LIVESTOCK EQUIPMENT & LUMBER
Farmaster Big Valley galvanized hog feeder - good; Big Valley calf cradle; Hog scale; (4) round pipe farrowing crates w/ feeders; (11) galvanized farrowing crates; Pig creep feeders; LB White propane heater; 100 gal. propane tank; Propane tank heater; (2) Brower hog waterers; Several metal hog troughs; (2) 16' tubing & panel gates; Portable loading chute; Chicken waterers & feeders; Several round bale feeders; Heavy rectangle bale feeder; Mineral feeders; (2) silage bunk tires; 2-ton bulk bin - good; Larger bulk bin on stand, needs some bottom repair; 2-ring bulk bin on stand - good; Large pile of 1"x4" flooring boards - good; Large pile of 2"x10"x10' long lumber - good; Several 2x8"x18' lumber - good; Approx. (40) sheets of plywood; Large mix pile of 2x6" and 2x8" lumber, 12'-16' long.

MOWERS, ANTIQUES, IRON & MISC.
JD LT155 rider mower w/ 38" cut; Wheel Horse Charger 12 automatic drive lawn tractor w/ 42" and 48" mower decks & snow blade plus a front mounted 4000 watt 220 amp. generator; 46" JD snow blade; (1) new roll of yard fence wire, also some used yard fence; Assorted electric fence and other fencing materials; Across the bed 5th wheel hookup for pickup; Tall shop A-frame; Assorted hand and shop tools; Oliver 77 rear end w/ axle and fenders; Old claw foot cast iron tub; (3) old foot pedal grindstones; (4) cast iron bath tubs - newer style; 1930 Model A frame, engine, wheels & other parts; Old truck scale beams; Lots of old iron; PLUS MANY OTHER ASSORTED ITEMS!

partner to inspire and educate future leaders

facing our industry—such as climate change, deforestation and water conservation—and so much more."

The National FFA Organization's sustainability leader development program will receive \$300,000 of the investment, supporting the organization's efforts to re-evaluate programs and events to include educational resources, experiential learning and leadership development opportunities for future sustainability-driven influencers. The multi-year commitment also elevates support of:

The state officer leadership continuum—impacting FFA members by developing leadership skills and personal growth for 375 state officers.

Living to serve platform—supporting 57,000 hours of service to make a difference in local communities across the country through chapter service projects.

The agriscience fair—developing students interested in and excelling in science and research, with more than 415 projects approved for competition at the national level. 89% of students report

capacity and what that means for future growth in the cattle business. He will assess where the industry stands with herd expansion and what that means for beef supplies in 2020. Blach's outlook for the year ahead will consider grain prices, energy costs, the macroeconomy, beef exports and consumer demand for beef and its competitors.

The Industry Information Session, sponsored by Elanco Animal Health, will feature two speakers discussing how the industry is positioning beef as plant-based protein options gain notoriety. This involves separate, but closely coordinated efforts between both the checkoff and policy divisions of the National Cattlemen's Beef Association (NCBA). From the checkoff perspective, NCBA senior vice president of global marketing Alisa Harrison will outline how checkoff dollars are being used to highlight the taste and nutritional advantages of beef. High-level digital strategies and paid advertising on social media platforms are among the ways this is being accomplished. In addition, Kansas Beef Council staff will share a video featured in the upcoming in-state checkoff campaign titled "One Simple Ingredi-

having a better understanding of science's role in agriculture after competing in the fair.

Recruitment and retention of quality agriculture educators.

For nearly 60 years, Cargill has partnered with the FFA Organization to create innovative ways to inspire youth in agriculture, investing more than \$16 million to foster innovative career education and support career development events, leadership development conferences, agriscience fairs and areas of service. Cargill and FFA have brought together corporate leaders, academics, FFA state officers and students around a shared vision for the future of agriculture.

"Cargill is proud to support the work FFA is doing to cultivate a better future for all, by empowering young people to be leaders in agriculture, food and nutrition," said John Niemann, president, protein ingredients & international channel, Cargill Protein-North America, and current Chair of the National FFA Sponsors Board. "Work-

ent." The message, targeted at millennials and Generation Z consumers, provides positive differentiation for beef from meat substitutes. The policy side of the fake meat issue will be presented by NCBA Vice president of government affairs Ethan Lane. He will outline how NCBA staff in Washington, D.C., is working to ensure all protein sources, including the plant-based varieties and cell-cultured options of the future, are produced and marketed under the same food safety and labeling standards as animal-based proteins.

The Consumer Trends Forum, hosted by the Kansas Beef Council and Kansas CattleWomen and sponsored by the Kansas Soybean Commission, will feature Elanco Animal Health technical consultant in sustainability Sara Place. She will highlight how the cattle industry has reduced its environmental footprint in recent years. In her previous role as NCBA senior director of sustainable beef production research, Place oversaw the checkoff-funded life cycle assessment used to benchmark the sustainability of the U.S. beef industry. She has been interviewed on the subject by many major media outlets and has spoken on high-profile

ing together, we can ensure American agriculture continues to build vibrant communities, supports prosperous families and rewarding careers, and produces the food we need to feed a growing population."

"National FFA values Cargill's longtime support through their sponsorship and partnership based on shared values," said Molly Ball, president of the National FFA Foundation. "The nearly 60-year relationship has helped cultivate the talent pipeline for agriculture, and continues to develop future leaders that positively impact the industry and the world."

The National FFA Organization provides leadership, personal growth and career success training through agricultural education to more than 700,000 student members who belong to one of the more than 8,600 local FFA chapters throughout the U.S., Puerto Rico and the U.S. Virgin Islands. The organization is also supported by more than 8 million alumni and supporters throughout the U.S.

panels targeted at the consuming public.

An individual who takes his humor seriously will entertain the crowd at the Cattlemen's Banquet, sponsored by INTRUST Bank and Tyson. Devin Henderson helps people use humor to perform at their best in the workplace. He will show livestock producers how humor can help them deal with change, stress, failure and difficult people. Henderson's presentation is sponsored by Micro Technologies and Zoetis.

KLA members will review existing policy and consider new resolutions during committee and council meetings at the convention. Among policy issues expected to be discussed are proper labeling of meat alternatives to better inform consumers, continued efforts to preserve and enhance the lesser prairie chicken population, trichomoniasis and the CattleTrace project. Final policy consideration will come during the general KLA membership meeting at the end of the convention.

The KLA Trade Show will feature livestock products and services on display for producers, as well as being the site for many social events and meals at the convention. A barn party will close out the trade show schedule, with entertainment by the Jared Daniels Band. The band's appearance is sponsored by Merck Animal Health and Kansas Feeds.

Schedule and registration information is available on www.kla.org or in the November/December Kansas Stockman. All livestock producers are welcome to attend.

KLA works to advance members' common business interests on legislative, regulatory and industry issues affecting producers at both the state and federal levels. The association's work is funded through voluntary dues dollars paid by its members.

McCook Farm, Ranch and Hemp Expo to be held Nov. 20-21

The McCook Farm, Ranch & Hemp Expo will return to the Red Willow County Fairgrounds on Wednesday and Thursday, Nov. 20-21, 2019.

"We are excited to fill the fairgrounds. The McCook Farm, Ranch, & Hemp Expo is a great place to come see the newest and latest in farming and ranching technology practices," said Darren Dale,

show owner. "We are expecting over 400 vendors from 20 States, Canada and Australia. The McCook Farm & Ranch Expo is the place to find all your livestock and farming needs. We have shopping for everyone in the family! And, if you're in the market for new Fenoglio Boots or an American Cowboy hat, the expo is the place to be!"

Once again Star Expos is leading the field in technology and is excited to be adding hemp components to their shows. Agriculture has been waiting a long time for this opportunity. Hemp production will allow producers to diversify their farming programs and create new markets. The benefits of hemp to the ag industry are massive for the future of agriculture. Commodity exchanges are being created for both industrial and medical hemp products, giving buyers, sellers and traders the place and tools to trade.

Exhibitors include numerous cutting edge displays for farm and ranch equipment, seed and chemicals, agricultural services, irrigation manufacturers, financial providers, commodity organizations, col-

leges, governmental services, home services, furniture and art galleries, boutiques, hats, boots, and much more. There truly will be something for everyone.

The "Live Show" stage, with your host Jared Slagle, is back by popular demand. The "Live Show" stage will host seminars, demonstrations, interviews, educational information, and even a little music.

They are excited to have J.D. Wing horse training demonstrations back both days of the show. J.D. is the head horse trainer for the Tee Cross Ranches. The famous Tee Cross brand was the first brand registered in the state of Colorado and is synonymous with quality in both its Quarter Horse and cattle operations. The horse training demonstra-

tions are brought to you by Bobby Norris Real Estate.

The Coppermill Steakhouse & Lounge and Loop Brewing Company will be hosting the beer/cocktail garden again this year. Come out, get a refreshment and a slice of pizza. This event will be held in the Kiplinger Arena beer garden/wine tasting area.

Don't forget the ever-popular Tres Rios Silver Working Ranch Horse Sale at 6 p.m. on Wednesday the 20th. Come out and bid on some of the finest ranch horses in the Midwest. Highest selling horse and buyer will receive a beautiful Tres Rios Belt Buckle.

In conjunction with the Working Ranch Horse Sale, they will also be hosting an FFA Benefit Auction. Several area FFA Chapters and Alumni will be participating and will auction off an item that they have made in class. All proceeds generated from the sale of the chapter's item will go directly to that FFA chapter. Give them a call to get your FFA chapter involved, or simply make a class project and bring it to the expo!

Hemp industry expert Brian Waldrup will be featured at the Star Expo events.

Waldrup is a personal friend of Darren & Tana Dale - owners of Star Expos. With over 20 years of experience in agriculture in multiple growing climates domestically, Brian is a leader in sustainable practices of the emerging U.S. hemp industry. As an active hemp farmer currently based in the four corners region of Colorado, Brian has unique experience to help first-time farmers be successful. Knowing what works, what doesn't work & how to identify your niche in the industry are all priceless aspects of establishing a profitable operation. Brian brings his experience & exciting public speaking skills to our Hemp Expos to guide you into the projected multi-billion-dollar industry that is U.S. hemp!

Brian will be covering topics including:

- hemp production for CBD extraction
- hempseed oil & fiber production
- methods to maximize yields with minimal startup cost
- offer a full overview of the many ways hemp can become a consistently reliable crop as well as invigorate your local economy

Corporate sponsors for the expo include Plains Equipment Group®, Hometown Family Radio, Fenoglio Boot Company and The American Hat Company.

For more information, contact Darren or Tana Dale at 866-685-0989 or info@starexpos.net or go online to www.StarExpos.net

New Generation Supplements

Cost Effective Protein Supplementation

The most cost effective forage a cow can consume is the forage she can harvest herself. However, protein often times becomes the most limiting nutrient for cattle grazing crop residues and dormant grass pastures. In these situations protein supplementation is required to efficiently harvest energy from these protein deficient forage-based diets.

Studies conducted at Kansas State University would illustrate that NGS protein supplements support both gain and efficiency when fed in conjunction with protein deficient forages. Find out more from your local New Generation Supplements dealer, Key Feeds.

Cowboy Up

by Ron Wilson
Poet Lariat

Last Supper?

“What Would Jesus Do?” That question was a popular saying in the 1990s, complete with WWJD t-shirts, wristbands and more. Recently I came across the following variation of that question: What Would Jesus Eat? Well, loaves and fish come to mind. Wasn’t that what Jesus used to feed a multitude of 5,000 people?

Now there is a new book which takes a serious look at this question, from a theological standpoint. The book is titled, *What Would Jesus Really Eat?* Specifically, the book provides a Christian perspective on the consumption

of meat.

The authors make no, um, bones about the conclusions they reached from their studies. The book is subtitled, *The Biblical Case for Eating Meat*. It was published in 2019 with support from the Animal Agriculture Alliance.

The book is edited by two men, neither of whom is an animal scientist or corporate agribusiness flack. One is an ordained Baptist minister and associate professor of public relations at Palm Beach Atlantic University, and the other got his Ph.D. in philosophy at Marquette. He serves as chair of philosophy and eth-

Bible and Beef

With people starving in the world, it seems unreal indeed, That there are those who would deny the protein that they need.

There are those who quote the Bible

for a vegetarian cause.

For a faithful believer,

that thought can give us pause.

But a new book has come out that explores this topic well,

And the conclusion is one that I am proud to tell.

When confronted with the question,

What Would Jesus Really Eat?

These authors found a Biblical case for eating meat.

From the Passover lamb to the feast with fattened calf,

They found the Scriptures support the carnivore’s behalf.

We are told we have dominion of the beasts of the field,

And to give our Maker thanks

for the meat that they can yield.

So if Jesus came to our house, if that were ever able,

I think I would be pleased to put a good steak on His table.

Happy Trails!

ics at Palm Beach Atlantic University and is a member of the Institute for Biblical Research. Chapters were contributed from various authors, including a veterinarian and a professor at a theological seminary.

The book explores the theological arguments about meat consumption. It concludes that, not only is there a Biblical basis to eat meat, such a practice is blessed by God.

The authors point to several of Jesus’s parables which which involved meat, such as when the Prodigal Son’s return was celebrated by a feast of the “fattened calf.” (I wonder if it graded choice or prime?) They cite the many examples of animal sacrifice in the Old Testament and the fact that a food chain was established from the very beginning, where man is assigned dominion over the beasts of the field. They point out that Jesus consumed the Passover lamb. Then there’s the whole “Thou shalt not live by bread alone” thing.

The book says that the Humane Society of the U.S. launched a “faith outreach” to convince Christians that vegetarianism is a moral calling, for example. Bible verses taken out of context can be used to support this view.

The authors of this book refute such opinions. One wrote: “Animals take nature

that people can’t use and convert it into something people must use. So just declaring a natural human biological activity (i.e., meat-eating) unethical is more in keeping with... cultural imperialists than with Christian beliefs.” He summarizes: “For Christians, there is clear guidance that (eating meat) is not only allowed but good.”

Of course, wanton animal abuse is not Scripturally condoned. Rather, we are called to be good stewards of our animals and to feed hungry people.

Another author wrote, “The Bible gives robust justification for meat-eating; in itself, meat-eating is permitted and even celebrated as a gift from God.” The concluding chapter even stated that “Raising animals for meat is a spiritual calling in response to the command to take our place in God’s kingdom.”

I doubt these deep philosophical questions are on the minds of cattlemen while they deal with the daily challenges of market volatility and caring for cattle. I especially doubt that such questions are uppermost in the minds of starving families overseas who desperately need protein to eat. I appreciate this book making the case for meat consumption.

What would Jesus eat? I would want to offer him the finest steak.

Tell them you saw it in Grass & Grain!

Soil testing hay fields & pastures

By David G. Hallauer, Meadowlark District Extension Agent, Crops & Soils/Horticulture

A few weeks ago, I outlined some soil testing procedures that you might want to consider if you are pulling soil samples this fall. If you want to check them out, you can find them Under Weekly News Articles on the Crops & Soils page of our Meadowlark Extension District at: <https://www.meadowlark.k-state.edu/crops-soils/index.html>. This week, I want to focus on some of the reason why fall sampling might have some advantages for forage producers.

First, it gives us some time to plan applications. Soil sampling is recommended on an every three to four-year basis. After you’ve completed that sampling cycle a couple of times, you can start to fine-tune your application rates even further. It allows us to better apply what we need to so that we can produce forage economically. Remember: for a good test, take at least 15-20 cores or subsamples from various locations in the stand and combine them for a composite sample. Samples should be pulled from a zero to six-inch depth.

Lime is one of the nutrients we need to be tracking, due to its importance in our forage crop system, particularly if legumes are involved. Optimum pH level is between six and seven, depending on the forage species. Brome/fescue can do well at lower pH’s, but legumes typically prefer pH levels closer to seven (to maintain nodulation). If pH levels are plenty high, adding lime is only going to raise levels further, potentially reducing uptake of macro- and micronutrients. Whenever possible, apply lime as far in advance of the growing season as possible. For a more rapid response to lime, use fine-ground liming materials with a high effective calcium carbonate (ECC).

If you have any cattle to be looked at call Ron or Austin

By Glenn Selk,
Oklahoma State University
An Oklahoma cow-calf producer once asked about the repeatability of calving difficulty in young cows. He had a two-year-old heifer that endured a very difficult delivery. After the event is over and the cow and calf are doing well, the rancher can't help but ask the question: "If a heifer has calving difficulty this year, what is the likelihood that she will have trouble again next year?"

Repeatability of calving

difficulty may not tell the whole story. Calving difficulty as a two-year-old had a profound effect on productivity. That question is followed by the thought of the money invested in this young heifer to grow her to a two-year-old. Should she be culled next spring after weaning because of calving difficulty this fall? A look back through the scientific literature sheds some light on this subject. Research conducted by Colorado State University and published in 1973 looked at

parturition records of 2,733 Hereford calves sired by 123 bulls and born to 778 cows/heifers. (Source: Brinks, et al. *Journal of Animal Science* 1973 Vol. 36 pp 11-17). A repeatability estimate was obtained from heifers calving both as two- and three-year-olds. The repeatability estimate was a lowly 4.5%. Of 195 heifers that had no difficulty in calving at two years of age, 7.2% had difficulty as three-year-olds. Of the 77 heifers that experienced calving difficulty as two-year-

olds, 11.7% had difficulty again as three-year-olds. Proper heifer development to a body condition score of 5.5 or 6 at calving, along with breeding heifers to bulls with a higher calving ease direct EPD should help reduce calving difficulty in two-year-olds. However, repeatability of calving difficulty may not tell the whole story. Heifers that experienced calving difficulty as two-year-olds weaned 11% fewer calves of those

born the first year and 14% fewer calves per cow exposed the second year compared to contemporaries that had no difficulty at first calving. The calves from three-year-olds that had calving difficulty at two years of age were born an average of 13 days later and were 46 pounds lighter at weaning than calves from three-year-old dams that experienced no difficulty at 2 years of age. From this research we learned that calving difficulty

as a two-year-old had a profound effect on productivity. The likelihood that calving difficulty will happen again next year is only slightly greater than in heifer counterparts that calved unassisted this year. Proper heifer development to a body condition score of 5.5 or 6 at calving, along with breeding heifers to bulls with a higher calving ease direct expected progeny difference (EPD) should help reduce calving difficulty in two-year-olds.

Operation Main Street shares facts about pig farming with 10,000 groups

After debuting nearly 15 years ago, the Pork Checkoff's Operation Main Street (OMS) program has reached a major milestone – sharing facts about pigs and pork to 10,000 audiences. Wesley Lyons, a veterinarian from Sycamore, Illinois, made the historic presentation to nurses at the Northern Illinois Chapter of the American Association of Critical Care Nurses Fall Forum in Rockford, Illinois. "I was honored to present the 10,000th OMS speech, especially to a group of critical care nurses," said Lyons, with Pipestone Veterinary Services. "Nurses often have more time to interact with patients than physicians, which makes them

a critical group for us to share up-to-date information about how pigs are raised today."

The OMS program was created to help pig farmers interact with and connect to their communities about animal care, food safety and public health and other facets of how today's pigs are raised. Since then, it has transitioned into a program that also reaches key influencers, expanding to include veterinarians such as Lyons and other industry representatives to serve as speakers. To date, the nearly 1,500 trained OMS speakers have collectively volunteered 17,604 hours to share pork's story. "OMS provides the opportunity for audience members to ask questions about pigs and pork from the farmers and veterinarians who care for pigs daily," said Ernie Barnes industry services director for the Pork Checkoff. "OMS speakers interact with chefs, nurses, veterinarian students, nutritionists, bloggers and other important groups who

interact daily with audiences. OMS presentations help them confidently and accurately talk about the science and practice of raising pigs."

A new program update is an ability for audience members to virtually tour a pig farm. Through a collaboration with South Dakota State University (SDSU), OMS speakers can include live-streaming video tours of SDSU's Swine Education and Research Center, in Brookings, South Dakota. "The live tours show how pig farmers follow the We CareSM ethical principles every day in their barns to raise healthy pigs," said Lyons, who included a virtual tour in the 10,000th presentation. "Many people are surprised at the high level of care pigs receive in the climate-controlled barns and at how pig farmers safeguard natural resources."

OMS speakers and those who attend presentations are encouraged to use the hashtag – #OurPorkStory – to increase the online presence of pig farming.

REAL ESTATE AUCTION

156.06 acres, M/L, of Nemaha County Farmland

SATURDAY, DECEMBER 14, 2019 — 1:30 PM

AUCTION LOCATION: The Centralia Area Community Center, 106 John Riggins Avenue — CENTRALIA, KS

Property Location: 2 miles East of Centralia to "I" Rd., then 2 miles North on the East side. This property is bordered on the North by 104th Rd.

Legal Description: The Northwest Quarter (NW 1/4) of Section 33, Township 3 South, Range 12 East of the 6th PM, Nemaha County, KS

This property consists of 156.06 taxable acres, of which there are 150.79 DCP cropland acres, according to FSA records. 141 acres are currently being farmed with balance in waterways and a wooded draw with wildlife habitat. This land is all terraced with tile outlets.

Base Acres: Wheat - 51.17 with 41 yield; Corn - 38.53 with 107 yield; and Soybeans - 44.4 with 45 yield.

SELLER: ALFRED ROEDER TRUST

Terms: The Seller requires 10% down payment day of sale with the balance to be paid on January 14, 2020. Possession to be upon closing. Buyers and Sellers to equally split the title insurance and escrow closing costs. Sellers to pay 2019 taxes in full. Buyers to be responsible for 2020 taxes. Statements made sale day take precedence over printed material. Cline Realty and Auction, LLC represents the Seller's interests.
