

## The Fork in the Road provides fresh produce and home-cooked meals

By Donna Sullivan, Editor

The fact that she loves growing food and preparing it into sumptuous feasts is something Valerie Visser of Riley attributes to her parents.

"There's something so rewarding about planting seeds, nurturing them and watching them grow, and then reaping the rewards of that work," she quoted her father as saying in an essay she wrote for her high school English class. The passion with which he spoke the words has stayed with her ever since.

Then her mother would take the food grown on their farm near Selden and turn it into three square meals a day for her family of ten. "I'm still convinced she has superpowers," Val wrote on her website.

Val has combined those two loves into a business that benefits the whole surrounding community, in an area that, until the recent addition of a Dollar General, could have qualified as a food desert, with the nearest grocery stores at least 15 miles away in Manhattan.

In a little cottage with a bright pink door, Val and her husband Justin have established The Fork in the Road, a self-service market offering fresh produce and made-from-scratch food. Along what she grows in her own garden in the summer, she is able to order all kinds of fruits and vegetables year-round. "I order things that are popular and that I would buy," she said. "Like apples, bananas, carrots and celery, that kind of thing. I don't want things that are expensive or have a short shelf life, because I want to avoid waste. Another thing I consider is, if it doesn't sell and gets a little past its prime, can I turn it into something else?" Val graduated from high school in 2006 and came to Kansas State University. Beginning as an architecture major, she eventually switched to education, then realized that although she has a great respect for teachers, that was simply not her calling. She began working on the Vissers farm, then she and Justin began dating. She left college when they got engaged. She turned the basement of their home into

a commercial kitchen and began making and selling the Satisfiers cookie dough that her parents make, expanding their business into this corner of the state. She did that until they began having children and it became harder to carve out the time needed to make the dough and fill the orders.

She then turned her attention to their garden and started selling the excess vegetables at a stand at the end of their driveway. When the wind kept damaging their tents, she decided a more durable option was needed and, with a bit of help from her brother Andrew Broeckelman, turned an old pickup truck into a food stand in August of 2015. A cash box and scale allowed people to purchase the vegetables on the honor system, and Val never felt like it was taken advantage of. She used the truck for two years, then took a year off to help Justin and his dad on the farm when their hired man quit right before fall harvest. She helped through that fall harvest, then all through the year to the following harvest. And while she enjoyed helping out on the farm, she knew that isn't her calling. "I really wanted to be growing and selling vegetables, catering and being at home, running a business," she said. "Because being away from home was not easy." This past summer, The Fork in the Road truck was back in business, but the truck itself was starting to show wear and tear, and Val began dreaming of a building a permanent structure.

It was at a Women's Encounter with Christ event

Valerie and Justin Visser are shown with their children, Samuel, 7, Jeremiah, 8 and Ella, 4, in front of The Fork in the Road market this fall. *Photos by Donna Sullivan* 

outdoor area for selling plants, and she hopes to add a high tunnel this winter.

Along with the market, Val has a full catering business. "The nice thing about the catering is I can say no if I need to," she said. More information about the market and catering can be found at theforkintheroadks.com.

People in Riley and the surrounding communities have wholeheartedly em-

that Val came to a turning point. "I felt like I was being asked to turn it over to God," she reflected. Her hesitation in surrendering her dream stemmed from the fact that she was afraid God would put a stop to it. "When I did the cookie dough, there was a very clear moment where I felt like God was telling me to shut it down." she recalled. "I was afraid that would happen again if I turned this over to God, so I didn't."

But then she did.

"I said to God, 'If you want me to do it, I will do it the way you want me to," Val said. "I know it sounds crazy, but it was

A wide variety of fresh produce is available, along with homemade rolls, soups, pies and casseroles.

like I heard, 'Okay, thank you, that's what I've been wanting. Now that you have the Master Builder on board, let's get to work.'"

Once the project was surrendered, Val says she didn't think about it as much, and things just started falling into place. "The design of the building, where we put it and everything," she said. Tyler Eakes, who was building it for her, encouraged her to go ahead and add electricity so she could have air conditioning, refrigeration and freezers.

Along with the fresh produce, The Fork in the Road offers the Satisfiers cookie dough, homemade pies, cinnamon rolls, bierocks, soups and casseroles. In fact, it's the homemade meals that sell the best. "I had a note from a lady in Clay Center that works in Manhattan," Val described. "She told how she can get home and throw them in the oven, get baths and homework done, then sit the family down for a hot, nutritious meal."

Sitting beside the market is a gazebo made from an old grain bin, where Val hopes busy parents can sit and relax, making out their menus and shopping list as their children play on a nearby sandpile. This spring she will have a large braced The Fork in the Road, and many travelers have stopped in as well. "The enthusiasm and support from the local community has been overwhelming, more than I ever could have imagined," Val said.

While some might question the honor system way of doing business, it works for Val, as people weigh their own produce, calculate their tabs and leave the money in the box. She can't tell where there has been any problems at all, and she's really not worried about it.

"I'm not doing this to be a big money-maker," she said. "But because it's what I feel like I'm called to do."

## Agriculture's woes drag down Kansas personal income growth

(AP) - Personal income growth in Kansas is below the national average largely because of troubles in agriculture.

Kansas farmers face an expanding drought and low commodity prices, though a break in an ongoing tariff dispute may bring those prices up. Agriculture makes up about 40% of the state's economy, with industries related to agriculture and food production worth about \$65 billion annually.

Kansas Public Radio reports that the state's personal income has grown by 1.6% since late 2007, when the Great Recession started. The national rate is 2.1%.

"Farmers have bills to pay," Kansas Wheat Commission CEO Justin Gilpin said. "Ultimately, what we need to do is hopefully see commodity prices somewhat bottom out here and get trade going."

The blow to farmers has been softened by a total of \$732 million in federal trade-bailout money in 2019 alone.

But agriculture's troubles in Kansas also come with problems for another major sector of the state's economy, aviation. Boeing plans to halt production of its troubled 737 Max in January and Kansas may start paying workers at Wichita-based Spirit AeroSystems, which makes their fuselages.

Joanna Biernacka-Lievestro of the Pew Charitable Trusts said the Kansas farm industry was "the biggest drag on personal income growth over the past year."

While all states have seen their economies grow since the Great Recession, Kansas had the eighth-worst personal income growth in the nation over the last year. Biernacka-Lievestro said the Midwest "lags the country in total personal income growth over the past year."

Kansas Department of Agriculture Economist Peter Oppelt said low commodity prices mean farmers take home less money while costs keep rising for seed, fertilizer and labor.

"If the farming sector is not doing well, those farmers aren't going to go out and buy a new truck or they may not eat out as much at a restaurant," Oppelt said. "The rest of that community is going to feel the effects."

A nearly two-year-old trade fight with China has

led to tit-for-tat tariffs affecting U.S. agriculture exports. Gilpin said he hopes it's temporary pain as the U.S. started forging a truce with China in mid-December. Farmers also might benefit from the impact of renegotiated deals with Japan and Korea.

The U.S. House also recently gave President Donald Trump a big bipartisan victory by approving a renegotiated trade agreement with Canada and Mexico, and the Senate is expected to consider it after the holidays. They are the two top destinations for Kansas crops.

#### Roaring into the 20s By Jackie Mundt, Pratt

Farmers of America Clay Center and Chapman chapters.

County farmer and rancher

Almost 15 years ago, I gave what would be one of the most important speeches of my career at the National FFA Convention. I agonized over creating the right message in hopes of making a lasting impact.

Years later, I watched another FFA member give the exact same speech. It had different stories, but the main points and overall message were the same. I was shocked because there was no way that

linked with this recall.

person.

this FFA member heard my speech. Their own life experiences must have led them to the same thoughts I had more than a decade prior.

Maybe it is a function of human nature or the product of a constant struggle to achieve the things we yearn for like success, love or the American Dream; ideas and lessons are rarely completely original or unique. Humans throughout history seem to live the same stories and plots repeatedly.

A few weeks ago, in my preoccupation with the too-

The Kansas Department of Health and Environment (KDHE) would like to alert consumers that a voluntary recall was issued on Monday, December 30, 2019, by Clay Center Locker

Plant for any ready-to-eat product including smoked pork loins, ham hocks, and smoked ham

from the Clay Center Locker Plant located at 212 6th Street, Clay Center, Kansas, produced on

November 21, 2019, because of potential contamination with Listeria monocytogenes. KDHE

urges the public not to consume any product that will be part of this recall. This includes prod-

ucts purchased at the retail counter in the plant and the hams that were delivered to the Future

part of a routine sampling program by the Kansas Department of Agriculture. All known affect-

ed distributors and retail and food service customers are being notified. Some of the products

were sold through FFA chapters in Chapman and Clay Center. To date, no illnesses have been

in pregnant women, newborns, elderly people, and others with weakened immune systems. Al-

though healthy individuals rarely become ill, older persons and those with weakened immune

systems may suffer high fever, severe headache, stiffness, nausea, abdominal pain and diarrhea.

Listeriosis can cause miscarriages and stillbirths among pregnant women. Symptoms begin

from three to 70 days after consuming the bacteria. Listeria cannot be spread from person to

care provider. For questions related to the recalled products, consumers can contact Clay Center

Locker Plant at 785-632-5550. For questions about listeriosis, please visit the CDC website at

www.cdc.gov/listeria or call the KDHE epidemiology hotline at 877-427-7317.

Anyone who believes they may have become ill with listeriosis should contact their health

Listeria monocytogenes is an organism that can cause serious and sometimes fatal infections

This recall was initiated after Listeria monocytogenes was found in a food sample tested as

KDHE alerts consumers to recall

short span between Thanksgiving and Christmas, I received invitations to multiple Roaring Twenties-themed New Year's Eve parties. What an original idea (at least to me), to celebrate a time that history books hailed as a time of whimsy, spectacle and entertainment.

Since then, this idea that history repeats itself and has been on my mind. What will the 2020s have in common with the 1920s, and, more importantly, what can be learned from a decade that earned the moniker "roaring"?

This curiosity led me to a brief internet refresher because the attributes filling my mind were all the Great Gatsby. My search revealed interesting facts and similarities to modern life in this gap between World War I and the Great Depression.

Like today, there was a presidential election. Warren Harding's successful campaign used the slogan "Return to Normalcy," painting a nostalgic picture of life before WW I, which ended a year earlier. Harding called for politics that were, "not the dramatic, but the dispassionate" and for people to remember that "human ills are not curable by legislation... excess of government offer(s) no substitute for quality of citizenship." President Harding was popular until scandals came to light after his death in 1923.

The title roaring came from all of the excitement of the time. The economy was growing. New products like automobiles, moving pictures and radio brought "modernity" to the masses. Social change was prevalent with women winning the right to vote in many states and national debates taking place about prohibition, immigration, political corruption and industrialization. It was the age of Gatsby with jazz, art deco, flappers and speakeasys. The decade has a larger-than-life zeitgeist.

The Roaring Twenties had a definitive and halting end. All that prosperity and liveliness faded with the crash of the stock market in October of 1929 and a new era of hardship and scarcity in the Great Depression.

Parallels exist between the two times. Politicians are human, and humans are fallible. Some people still yearn for normalcy, while others desire social and political change. Technology and the economy have points of great growth, but that will not last forever.

My takeaway is simple. Spirit, not circumstance, can define people. Times will be both better and worse in my future. Be thankful for your current blessings and live life gregariously and fully at all times.

"Insight" is a weekly column published by Kansas Farm Bureau, the state's largest farm organization whose mission is to strengthen agriculture and the lives of Kansans through advocacy, education and service.

## Bill ensures shared FDA, USDA oversight of lab-grown meat

U.S. senators Jon Tester (D., Mont.) and Mike Enzi (R., Wy.) introduced a bill to ensure transparency in a new line of food products created using animal cell culture technology.

Tester and Enzi's Food Safety Modernization for Innovative Technologies Act works to ensure that an agreement between the Food & Drug Administration and the U.S. Department of Agriculture - designed to ensure that products are safe and accurately labeled - would have legal authority over animal cell-based products created in a laboratory rather than raised on a ranch.

S.B. 3053, introduced by Enzi and Tester, would ensure that the agreement between the two agencies has the force of law. The Meat &

indicates that cell culture products (CCPs) should be under the oversight of USDA's Food Safety & Inspection Service (FSIS), while FDA will have a role in ensuring that the ingredients used in the manufacture of such products are safe.

Cell culture technology allows developers to lab-produce consumable animal tissue from cell cultures, which could become purchasable in grocery stores within the coming years. Under the agreement, FDA would be charged with overseeing the process of multiplying collected cells to make tissue, and USDA would oversee processing, packaging and labeling. FDA would oversee all phases of development and production for products not derived from livestock or poultry cells.

ing products from these cells, only FSIS has the capability to provide continuous, risk-based inspection and apply strict labeling standards that will ensure consumer awareness of what CCP is and how it's produced," the National Pork Producers Council (NPPC) said in a statement.

NPPC noted that on March 7, 2019, FDA and FSIS signed a formal agreement to regulate CCPs. The agreement was designed to leverage the expertise of both agencies to protect the country's food supply and provide safe and accurately labeled products.

"It's critical that product names and label claims protect the investments livestock farmers have made to establish a definition of meat protein that is widely understood by consumers," NPPC said.

"Emerging technologies may reshape the food industry in the coming years," Enzi said. "Existing food safety laws were drafted long before these technologies were contemplated. Our legislation would create an up-to-date framework in law so agencies appropriately work together to ensure folks know what they are eating and that it is safe."

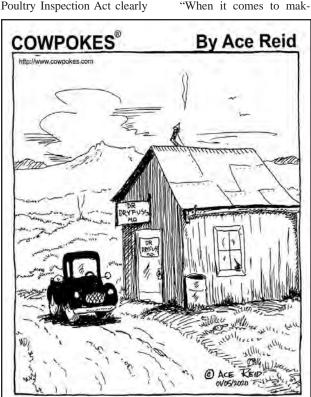

In a media call on Dec. 18, Nick Giordano, NPPC vice president and counsel, global government affairs, said getting oversight established at FSIS remains paramount to the pork industry. "We have no problem with competition; we just want to make sure our producers are on a level playing field. They want to call themselves meat. Fine, but you're going to get regulated under the same rigorous oversight at that we are at the Food Safety & Inspection Service," Giordano said.

I have settled into my winter chores. The ewes are all home and about to start lambing any day and the cows are into their calving pastures but about six weeks from calving getting kicked off. That means I am getting into the routine of winter chores and feeding. I noticed a funny pattern a few weeks ago but I kept my thoughts to myself; it wasn't until Tatum came home from college that I shared my observations with anyone else.

Every morning my routine is pretty much the same. Of course, each morning usually brings its own little twist, like cows being out, waterers being frozen or any one of a dozen maladies or pitfalls that generally sidetrack me each morning. However, I am a creature of habit and generally my chore routine is always the same. I start off by feeding the ewes. If I don't, I am afraid that they will tear the pens down. Sheep are very needy animals and equally as impatient. Then, after I get done throwing feed to the ewes (a time period I refer to as the silence of the lambs, which also induces an eye-roll from whoever is helping me) I move on to the chickens, followed by the cat and dogs. Then I fill a bucket with three scoops of sweet feed for the horses and a bucket of grain for my bulls. I leave my house and drive a circuit that takes me by all three groups of cows to make sure they are where they are supposed to be and to survey how many bales they might need that afternoon. I feed the bulls because I need their five-gallon bucket later; we all know what kind of valuable commodity five-gallon buckets are and I need eight of them. Once every three days the bulls need water unless someone else has taken the initiative and filled it up sooner. Then I go to Dad's house and fill up my eight buckets with calf feed. The horses are at the same place the calves are, so I feed them as I open the gate. Then my last chore of the morning is to feed the weaned calves. My entire circuit is carefully planned out to minimize travel and to make the most efficient use of my time. It will remain that way until I start lambing and once again change when we start calving. I am nothing if not a man of routine and habit.

rence that I considered an anomaly but soon I recognized as a pattern. No matter what I do, when I start or what happens, I finish chores somewhere between 9:00 and 9:30 each morning. Almost every morning I start between 7:00 and 7:30 depending on the daylight but occasionally it might be a little earlier or a little later depending on what is going on in my life. Some mornings I must water something and occasionally there will be a cow or ewe out that will necessitate

Something else came to my attention very early on this year, a strange occurmending fence.

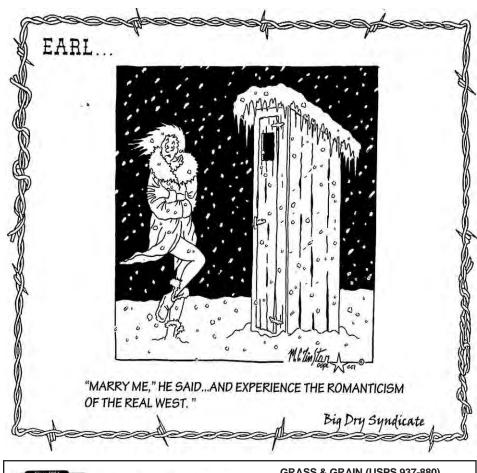

Occasionally I will run into a neighbor and we will discuss matters of importance. According to Jennifer this happens quite often and lasts longer than I admit. I am also prone to getting phone calls and texts during this time and because of my extreme lack of coordination I must stop what I am doing and answer them.

Tatum came home from college a few days before Christmas and volunteered to help with chores each morning. There is nothing better than the kids coming home from college eager and wanting to help with chores and work on the farm, at least that is what I have heard. In any case, Tatum has been going with me each morning on my same route. I assumed that extra help would make chores go faster but to my chagrin we continued to pull into the yard between 9:00 and 9:30 each morning regardless of what challenges the morning had presented.

I shared my observation with her after a couple of days and soon we began to monitor the finish time of chores each morning. Without fail, we pull up to the shop at my house at about 9:15 each and every morning. Tatum is also without explanation of why or how this happens. We have even tried to streamline the chores more by doing things ahead the night before and without fail chores will be done at the same time.

I don't have an answer as to why this happens every morning and Tatum has admitted that she is a bit baffled too. I chalk it up to be a creature of habit and maybe varying my speed (from slow to a fast slow) depending on what challenges await or appear. In the end, I just must take pride in, if nothing else, being consistent. At least that is my story, and I am sticking to it.

"Jake you're in purty bad shape yer allergic to sagebrush and prickly pear!"

#### ork Producers Council: ready to play offense in 2020 National P

The National Pork Producers Council (NPPC) says they are ready to play offense in 2020

"They say defense wins championships," says David Herring, NPPC president and a hog farmer from Lillington. N.C. "Frankly, when it comes to trade, we're tired of playing defense and hope 2020 is a year of progress and a strong offensive performance."

NPPC was pleased with the announcement of a phase one trade deal with China that will reportedly benefit U.S. pork and looks forward to learning more of the details, Herring says.

"China represents an unparalleled opportunity for U.S. pork producers to provide the highest quality and most affordable pork

in the world. It's no secret that China needs reliable, affordable sources of pork. No source is better positioned to meet this need than American hog farmers," he adds.

Nick Giordano, NPPC vice president and counsel, global government affairs, says U.S. Trade Representative Robert Lighthizer indicated that the U.S. is going to play some offense both with the United Kingdom and the European Union.

"That's really welcome news for producers," Giordano says. "We really ship very little pork to Europe both because of tariffs and non-tariff measures. This is a constant theme across U.S. agriculture so we're looking forward to FTA negotiations with the United Kingdom.'

Beyond the United Kingdom and the EU, NPPC has identified a number of countries, most of which are in Southeast Asia, where U.S. pork stands to benefit. Giordano notes Vietnam and the Philippines but says there is a whole list of opportunities.

As 2020 approaches, NPPC revealed its top eight priorities:

Implementation of the USMCA and Japan trade agreements.

Gain unrestricted market access in China to address its need for affordable pork.

Play offense on trade by expanding export opportunities in the Philippines, Vietnam. Thailand. Indonesia. etc.

Continue prevention efforts for ASF and other foreign animal diseases.

Establish regulatory oversight of gene-edited livestock with the USDA.

Find a solution for livestock agriculture's labor shortage.

Manhattan, KS 66502

Advance their legal challenge of California's Proposition 12.

Reauthorize the Livestock Mandatory Reporting Act.

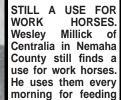

"I am confident that NPPC will successfully face these and other issues of importance for U.S. pork," Herring says.

7-LAYER DIP

(2) cans bean dip or (1) can refried beans mixed with green chiles

Avocado dip or 3 medium avocados

2 tablespoons lemon juice

Taco seasoning

8-ounce container sour cream

1 cup mayonnaise

Green onions, chopped

6-ounce can black olives, chopped

3 tomatoes, seeded & chopped

8 ounces shredded Cheddar cheese

On a platter spread out a layer of bean dip or refried beans mixed with chiles. Combine avocado dip or crushed avocados with lemon juice and layer on top of beans. Mix sour cream, mayonnaise and taco seasoning and make another layer. Top with green onions, olives, tomatoes and cheese. Chill and serve.

Kellee George, Shawnee, shares the following recipe:

#### HAM LOAF

3 3/4-pound ham, ground 1 pound fresh pork 1 quart milk 1/4 cup mustard 1 quart bread crumbs **Topping**: 1 3/4 cups brown sugar 2 1/2 teaspoons dry mustard 1/2 cup vinegar 1 can pineapple chunks

Mix ground ham, pork, milk. mustard and bread crumbs together. Make into 3 loaves. Use a 9-by-13-inch pan. Combine topping ingredients and pour over loaves. Bake at 350 degrees for 1 to 1 1/2 hours. \*\*\*\*\*

Nancy Rhodes, Abilene: **YUMMY CHICKEN & DUMPLING SOUP** 3/4 pound boneless skinless chicken breasts, cut into

1-inch cubes 1/4 teaspoon salt 1/8 teaspoon pepper 2 teaspoons olive oil 1/4 cup all-purpose flour 4 cups reduced-sodium chicken broth, divided 1 cup water 2 cups frozen french-cut green beans

1 1/2 cups sliced onions 1 cup shredded carrots

1/4 teaspoon dried marjo-

ram 2/3 cup reduced-fat biscuit/

baking mix

1/3 cup cornmeal

1/4 cup shredded reduced-fat Cheddar cheese 1/3 cup fat-free milk

Sprinkle chicken with salt and pepper. In a large nonstick skillet heat oil on medium-high heat. Add chicken; cook and stir until no longer pink. Remove from heat. In a large saucepan whisk flour and 1/2 cup broth until smooth. Stir in water and remaining broth. Add beans, onions, carrots and marjoram. Bring to a boil. Reduce heat and simmer uncovered for 10 minutes. Add chicken; return to a simmer. Meanwhile in a small bowl mix biscuit mix, cornmeal and cheese. Stir in milk just until moistened. Drop batter in 12 portions on top of the simmering soup. Reduce heat to low, cover and cook 15 minutes or until a toothpick inserted in center of dumpling comes out clean. \*\*\*\*\*

Kimberly Edwards, Stillwater, Oklahoma:

**LEMON BREAD** 1 package lemon cake mix

with pudding 1 small package instant

lemon pudding 3/4 cup oil

1 cup water

4 eggs

1/2 teaspoon almond extract

5 teaspoons poppy seeds Glaze:

1/2 cup sugar

3 tablespoons lemon juice Put all bread ingredients in a bowl and beat at medium speed for 4 minutes. Grease and flour 2 loaf pans. Split batter equally and bake at 350 degrees for 50-55 minutes. Before removing from pans prick top of loaves with a fork. Make glaze by stirring sugar and

lemon juice until the sugar is completely dissolved. Heat mixture 30 seconds in microwave. Drizzle over loaves.

- 1 teaspoon cayenne pepper **1 cup French-fried onions**
- **1 cup salted peanuts** 3 teaspoons onion powder

2 teaspoons garlic powder In a large microwave-safe bowl combine the cereals, crackers and pretzels. In a small micro-

wave-safe bowl melt butter. Stir in the steak sauce. Worcestershire sauce and cayenne; pour over cereal mixture and toss to coat. Microwave uncovered on high for 4 minutes, stirring every 2 minutes. Add the fried onions, peanuts, onion powder and garlic powder. Toss to coat. Spread onto waxed paper to cool. Store in an air-tight container. Yield: 2 1/2 quarts.

#### COCONUT **CHOCOLATE-COVERED CHERRIES**

- 1/2 cup butter, softened 3 3/4 cups powdered sugar 1/2 cup sweetened con-
- densed milk 1 teaspoon vanilla extract
- 2 cups flaked coconut 2 cups finely chopped wal-

nuts

(2) 16-ounce jars maraschino cherries with stems, well-drained & patted dry

- (2) 11 1/2-ounce packages milk chocolate chips
- 1 tablespoon shortening

In a large bowl beat butter and powdered sugar until smooth. Beat in milk and vanilla until well-blended and mixture looks like softened butter. Fold in the coconut and walnuts. With moist hands shape 2 teaspoonfuls of coconut mixture around each cherry forming a ball. Place on a waxed pachips and shortening. Stir until smooth. Dip cooled cherries into chocolate. Place on waxed paper. Let stand until set. Store in an air-tight container at room temperature for up to 1 month. Yield: about 5 dozen.

#### \*\*\*

#### **CHERRY PISTACHIO** BARK

(2) 10- to 12-ounce packages vanilla or white chips 12 ounces white candy

- coating, chopped 1 1/4 cups dried cherries,
- chopped 1 1/4 cups pistachios,
- chopped

Line a 15-by-10-by-1-inch pan with foil; set aside. In a microwave-safe dish melt chips and candy coating. Stir until smooth. Stir in the cherries and pistachios. Spread into prepared pan. Refrigerate for 20 minutes. Using a sharp knife score surface of candy about 1/8-inch deep making diamond shapes. **Refrigerate 40 minutes lon**ger or until set. Cut along scored lines into diamonds. Store in an air-tight container in the refrigerator. **Yield: 3 pounds.** 

#### **JEWELED** FRUITCAKE

(2) 8-ounce packages pitted dates, chopped

1/2 pound pecan halves 1/2 pound Brazil nuts

drained

10-ounce jar red maraschi-

1/2 cup flaked coconut

1 1/2 cups sugar

1 teaspoon salt

3 eggs

no cherries, well-drained

schino cherries, well-

1 1/2 cups all-purpose flour

1 teaspoon baking powder

2 teaspoons vanilla extract

floured 5 3/4-by-3-by-2-inch

loaf pans with waxed paper

and grease the paper; set

aside. In a large bowl com-

bine the dates, nuts, cher-

ries and coconut. Combine

## Prize for December 24 & 31, 2019 & JANUARY 2020! "Our Daily Bread" **Recipe Contest Prize**

## Sticky Pad Portfolio

Portfolio includes sticky list pads, note pads and flags.

Includes 7 sizes with 60 sheets per pad for a total of 420 sheets.

The winner each week is selected from the recipes printed. Send us your favorite recipe. It may be a main dish, leftover, salad, side dish, dessert, or what-have-you. 1. Check your recipe carefully to make certain all ingredients are accurate and instructions are clear. 2. Be sure your name, address and phone number are on the entry. Please include a street address with your recipe entries. A post office box number is not sufficient for prize delivery. Allow 3-4 weeks for delivery.

3. Send it to: Woman's Page Editor, Grass & Grain, Box 1009, Manhattan, KS 66505. OR e-mail at: auctions@agpress.com

per-lined baking sheet. Cover and refrigerate for 1 hour or until chilled. In a microwave melt chocolate

a serrated knife. Yield: 4 mini loaves (6 slices each). \*\*\*\*\*

### A New Year's Resolution For Parents: Build A Great Relationship With Kids

MANHATTAN – A new year is often the time when people make resolutions to exercise more, eat healthier or save more money.

But Kansas State University child development specialist Bradford Wiles says one of the best resolutions that parents can make is to strengthen the connection with their children.

"The biggest thing that I would advocate for is intentionality," Wiles said. "What we know about parenting is that oftentimes we react and are working toward meeting needs without considering all of the other things that are part of those interactions."

"But," he adds, "if I could wave a magic wand, I would say if you are going to have a resolution, then resolve to work directly with your child and be intentional in your interactions with them."

For parents, that could mean making additional time to read to young children, or involving them in preparing their lunch. Even young children can help with laundry by putting their folded clothes into their drawers.

"Kids want to be like mom and dad, or like aunt and uncle," Wiles said. "It's our job to show them how to do that, to be really intentional – and the greatest thing is that it is its own reward. When you're doing that and they're paying attention and you're able to build that bond, it is good for parents, too. It's not just children that benefit."

He adds: "We do that pretty well during the holidays; you know, we take them shopping, we take them to other people's houses for celebrations ... But throughout the year is a great time to continue to do that, to continue to have them involved. That's how you build that positive relationship. Not only the time, but quality time. So being intentional, and including children in the things you do is such a tremendous way to build a great relationship."

As parents interact with their children more purposely, the child also begins to develop more selfworth, Wiles said.

"I vividly remember vacuuming with my mother and feeling like I was contributing in that way, and

KBS

building self-esteem and self-efficacy," he said. "It's really crucial for children to be able to identify with things that are good."

As children grow, parents can also be intentional in how they increase their helping skills. For example, younger children may first be taught to wash spoons, but as they grow older, they can move up to forks and knives. And when the child does well, help them understand why it was a job well done.

"Use the word 'because," Wiles said. "Children may not understand 'why' things were great. So tell them, 'you did a good job because you used the towel the way I showed you,' or, 'you put enough soap into the basin. ...'

"It's about helping them understand that you care about their development. As a parent, you are always modeling behaviors and providing feedback, and helping them understand why things are 'good.""

Wiles also said parents should be intentional in putting down electronic devices in favor of spending time with children. He said when parents are constantly looking at phones or tablets, "you're modeling this as socially acceptable.

"You are essentially saying that 'whatever is on the phone or tablet is more important than you are, and I just don't think that is the message we want to convey," Wiles said. "I would submit that we have plenty of time for that after our children go to bed. It is important for us to pay attention and be intentional and engaged because it goes by very quickly. It makes a big difference in our children's lives."

Wiles adds: "Positive attention goes a long way in preventing behavior problems. At our core, we want to be loved and we want attention from our loved ones. Children will certainly remind you of that, and I think it's good that you want to be there for them. One of the greatest things to honor that is you can show them that they're valued."

More information and tips for raising healthy families is available online from K-State's School of Family Studies and Human Services.

## New Year, New You

By Lou Ann Thomas Happy 2020! I hope this vear is already offering you hope and goodness. And if you made any resolutions, I hope that you are still sticking to them. But if you aren't, welcome to the rest of us. Studies indicate less than a quarter of us stay committed to our resolutions beyond 30 days and only eight percent of us see them through to completion. So why do we continue to make them every year? I guess we're

Away a hopeful people. Than Mew You a hopeful people. Mew You Than

The tradition of making New Year's resolutions dates back to the early Babylonians, who first observed New Year's about 4,000 years ago. The most popular resolution for those Babylonians was to return borrowed farm equipment. Today's No. 1 resolution is to lose weight, which is far more challenging than returning a borrowed rake or ox.

Because of this focus on weight loss and fitness goals, the media is bursting with ads for gyms, fitness centers and weight loss aids all promising results. I see a grand business opportunity in this. I'm thinking of opening a gym for the first two months of the year, then turning it into a bar for the rest of it.

Grass & Grain, January 7, 2020

Weight loss is on everyone's mind at the beginning of the year because most of us gain an average of seven to 10 pounds from Thanksgiving to the new year. Unfortunately, research indicates that few of us lose those pounds, and like rings on a tree, each year we add another layer, until we find ourselves stuck in our recliners unable to budge our ever-expanding girth.

Making changes to our diet and lifestyle that will foster better health and weight loss, if needed, is honorable and could add years to our lives. It would certainly add joy to whatever years we have left. But making a resolution, like "I'm never going to eat sugar again" is likely only setting ourselves up to feel failure and to then numb those feelings with Snickers bars.

Page 5

A new year is a great time to set goals and make intentions to better ourselves with a healthier diet and habits, or to save money, or learn better relationship skills, or whatever we would like to improve. But every day is a new day, so we can decide to make positive changes any day of the year and don't need to create a heap of pressure for ourselves at the dawning of a fresh, new year.

So happy new and gentle year, and for those of us ready to make some changes, whether it's losing weight, quitting smoking, or getting that farm equipment back to its rightful owners, happy new you.

## Make A Map For Your Wellness This Season

By Tara Solomon-Smith, Adult Development and Aging Agent, Wildcat Extension District

The end of another year and the beginning of the new often goes by in a blur because of all we have to do in this season. I am the queen of to-lists and get quite a bit of satisfaction out of crossing items off. This can help in busy times, however, I heard some insights from K-State Research and Extension's Behavioral Health Specialist, Brad Dirks, which reminded me to add self-care to the routine.

Stress has great impact on all areas of life which is why it is so important to work to tame it. Relationships, physical health, and job performance can each be negatively affected. Practicing self-care on a regular basis can make life's stressors more manageable. Just like we are each unique, your wellness will be look different than your friends and family.

Taking action for your wellness will be a journey and like most things in life will not be a straight line. So how do we get there? Create a road map by asking yourself the following questions.

1. 'Who do I want to BE,' not 'what do I want to ACHIEVE?'

2. How do I want to travel?

Self-care is the vehicle to your wellness. This will be different for each of us. Do you like to wake before your family to have a few moments to yourself? Do you like to find some time for exercise, maybe a quick walk after supper? Do you practice any deep breathing techniques?

3. Who can help you on this joury?

friends! Who in your life can you trust to help hold you accountable? Who in your circle can give you an outside the box view of you?

4. How will I know if I am moving along the journey?

Schedule some check-ups along with way. Be realistic and honest with yourself and friends.

5. Finally, give yourself grace for bumps and hills along the way!

Don't let the time of year and all the tasks before you overwhelm and steal your joy. Instead, give yourself permission to take care of your wellness so that you can meet all the other demands in life. Remember, your friends at K-State Research and Extension have resources to offer!

For more information, please contact Tara Solomon-Smith, tsolomon@ ksu.edu, or by calling 620-724-8233.

Grass & Grain, January 7, 2020

#### The Promised Land Before there was an offi-

cial Kansas Territory the larger area including present-day Kansas was known as Nebraska Territory. The organization of Nebraska Territory began with U. S. Congressman Stephen A. Douglas in 1844. Prior to that time the country west of Iowa, Missouri, and Arkansas was generally referred to as "The Indian Country." Douglas envisioned a large belt of land through the center of Indian Country he called Nebraska. His great hope was that the nation's first transcontinental railroad would be built through the Platte River valley of his "Nebraska Territory."

To the south, the Kansa tribe and the Kansas River lent the name of "Kansas" to Nebraska's central portion lying west of the City of Kansas on the Missouri River.

Douglas argued that the greatest barrier to settlement of Nebraska was the static border of Indian Country west of the previously mentioned states. "Should not this barrier be broken down?... [or] are our railroads and highways to the Pacific there to end?" A second bill proposed organization of a line of protective military posts on the road to California and Oregon. Douglas envisioned "a continuous line of

Visit Us in Booth #56 at the Topeka Farm Show!

settlements from the Mississippi to the Pacific," supported by a modern railroad with telegraph communications.

By 1847 Douglas was a U.S. senator. Across the west new lands were brought under U.S. control following the Mexican War. The old issue of slavery as it applied to the new territories became a contentious issue. The Missouri Compromise of 1820 that designated legal slavery in southern states could not reasonably be applied across the great expanse. The dispute brought heated and divisive debate to Congress.

Henry Clay led negotiations to find a settlement. With the support of Senator Douglas, a set of bills known as the Compromise of 1850 defused the discordant Congress. The compromise allowed self-determination in the question of slavery as states entered the Union.

In 1852 newspaper editors and engaged citizens took up the cause for Nebraska to be organized for settlement. Just north of Kansas City at Parkville, Missouri, residents convened a public meeting on June 17th "to petition Congress for the organization of the Territory of Nebraska. The

petition recognized that "the limits of the United States have been extended to the shores of the Pacific Ocean," including Oregon, California, Utah and New Mexico. Therefore, the "open space between the two flanks of civilization," should be made available to the many thousands of citizens emigrating over "lands of great fertility" which were withheld from settlement "under existing circumstances." The petition found it necessary to "extinguish" Indian title to the land in deference to settlement by American citizens who were expected to bring civilization to the "dreary and waste" of an undeveloped land. The petition suggested that "domiciling the Indians," on small parcels of land meant for "cultivation," would be the proper course of action.

An eventual Nebraska bill was introduced into Congress during the winter of 1852-1853. The bill passed in the House of Representatives, but was defeated in the Senate. However, momentum was growing in the west.

At the Wyandot Council House (present-day Kansas

would bring the slavery issue

to an acceptable conclusion.

olutions and produced a docu-

ment very similar to that of the

1852 petition. Stephan Douglas had toiled for ten years to

realize the dream of making

one nation by populating the

unorganized open spaces. The

elements of territorial organi-

zation were taking shape as

all eyes turned to the prom-

ise of settlement of new lands

of great fertility on The Way

West.

The convention passed res-

ment. The program is very beneficial to our industry because later, when we call on them to contact their legislator about a proposed law, they answer the call every time."

Each class will participate in three sessions designed to improve the leadership skills of Kansas agribusiness men and women through increasing their understanding of the association's mission and activities, teaching the state and federal legislative process, improving leadership and communication skills, and preparing members for possible public service through campaigns or public office.

The class will begin in January with an introduction to the legislative and regulatory arena in Kansas with keynotes provided by legislative leaders. The group will travel to Washington, D.C., in July for personal visits with Kansas' congressional delegation on Capitol Hill. The final portion of the program teaches the class how to develop into an informed and confident leader in their profession with presentations provided by Wichita State University and the associations' elected leadership.

## Kansas Farm Bureau honors tradition and heritage of family farms

Kansas Farm Bureau is recognizing "Sesquicentennial Farms" in conjunction with its annual "Century Farm" program. The Century Farm program honors farms with owners or operators related to the original farm owner/operator for 100 years by Dec. 31, 2020. The Sesquicentennial Farm recognition goes beyond that to farms in the same family for 150 years.

"Kansas farmers and ranchers have a lot to be proud of," Rich Felts, Kansas Farm Bureau president, says. "One thing we take pride in is our value in the traditions and strong family ties of rural living. Kansas Farm Bureau is honored to celebrate those through the Century Farm and Sesquicentennial Farms programs."

The deadline for consideration to be part of the 2020 programs is May 15. Complete details for qualification and applications for both programs can be obtained at county Farm Bureau offices across Kansas or on the KFB website, https://www.kfb.org/Get-Involved/Century-Farm-Program.

## New veterinary medicine research projects take on foot-and-mouth disease and African swine fever

High-priority diseases in cattle and swine will be tackled by three researchers in the Kansas State University College of Veterinary Medicine with grants totaling nearly \$1 million from the U.S. Department of Agriculture's Agricultural Research Service.

Jürgen Richt, Regents distinguished professor and director of the Center of Excellence for Emerging and Zoonotic Animal Diseases, received a \$150,000 USDA ARS grant for "Evaluation of Novel Footand-Mouth Disease Virus Vaccine Candidates with Broad Breadth of Protection - Phase II."

With a \$176,900 grant, Mike Sanderson, professor of epidemiology and associate director of the Center for Outcomes Research and Epidemiology, is leading the project "Simulation Modeling of Footand-Mouth Disease Outbreaks in Livestock in the U.S."

"Actions Supporting the Development of an African Swine Fever Virus Live Attenuated DIVA Vaccine" is under the direction of Jishu Shi, professor of vaccine immunology, with a \$640,720 grant.

Both Sanderson's and Richt's projects focus on footand-mouth disease, which affects livestock production in many regions of the world, including much of Asia and Africa.

"Foot-and-mouth disease is a high-priority transboundary disease that would severely impair livestock health and production if introduced to the U.S.," Sanderson said. "The goal of this research is to model outbreak and control scenarios in the U.S. to improve preparedness and identify optimal disease response strategies to mitigate the impacts of a potential foot-andmouth disease outbreak."

Because the foot-andmouth disease virus is antigenically diverse, Richt said vaccines must be matched to target certain viral isolates to be effective.

"The objective of this research project is to support the development of novel foot-and-mouth disease virus vaccine candidates and determine their immunogenicity in its natural host," Richt said. "It will also help generate new knowledge on next-generation vaccines for this virus, with broader activity that will ultimately help to prevent and control foot-and-mouth disease."

Shi's research is centered on the development of control strategies against African swine fever virus, a threatening swine disease that has become a major issue in China and other Asian countries.

"The collaboration with USDA ARS is a valuable

partnership for us in African swine fever vaccine research and highlights the importance of the K-State Biosecurity Research Institute as a key facility for K-State researchers working on high-consequence animal diseases," Shi said. "It will strengthen our capability in research that will be related to the National Bio and Agro-defense Facility, or NBAF, and provide new impetus for our long-standing partnership with USDA ARS research scientists."

The Biosecurity Research Institute, known as BRI, is a biosafety-level 3 and biosafety-level 3 agriculture research facility that allows for the study of high-consequence pathogens affecting plants, animals and food products, including zoonotic pathogens that infect humans. NBAF will be the nation's foremost animal disease research facility and is being built by the U.S. Department of Homeland Security adjacent to K-State's Manhattan campus.

The two objectives of Shi's project are the development of accompanying differentiation of infected from vaccinated animals, or DIVA, tests for the African swine fever virus live attenuated DIVA candidate developed by the ARS, and the development of a stable cell line supporting the replication of those vaccine candidates.

#### Grass & Grain, January 7, 2020 Page 7 **Meadowlark Extension District offers** crop production meeting opportunities

By David G. Hallauer, Meadowlark District Extension agent, crops & soils/horticulture

Winter is Extension meeting season and January will not disappoint. In addition to Farm Bill meetings, a host of other opportunities are coming up as well.

If you're a soybean producer, consider a KSU Soybean Production School, sponsored by the Kansas Soybean Commission. Topics will include weed control, crop production practices, soil fertility, and insect/disease management. Our NEK versions will be held on Wednesday, January 22 at two locations. The morning session will be at the Cedar

NW of Atchison) running from 9:30 to 1:30. RSVP by January 17 to Ray Ladd (cladd@ksu. edu ). The afternoon session runs from 3:30 to 7:30 p.m. at the Helvering/Senior Center in Marysville. RSVP by January 17 to Anastasia Johnson, anastasia@ksu.edu .There is no cost to attend. Online registration is available: http://bit.ly/ KSUSoybean.

Ridge Restaurant (four miles

Plus, it's not too late to RSVP for the Nutrient Management/Soil Health Workshop on Thursday, January 23rd at the Evangel United Methodist Church (227 Pennsylvania St.) in Holton. Efficient nutrient use will be our focus, with an emphasis on managing nutrients in an economically and environmentally sound manner.

The program runs from 9:45 to 2:30, with presentations from two KSU Soil Fertility specialists as well as representatives from the Jackson Co. Conservation District, NRCS, KS Department of Wildlife, Parks and Tourism, and area WRAPS groups. RSVP for the sponsored lunch by January 14th to Brian Boeckman at the Jackson County Conservation District at 785-364-3329, extension 136 or via e-mail to brian.boeckman@ks.nacd.net . A program flyer and information can be found online under the Crops and Soils tab at

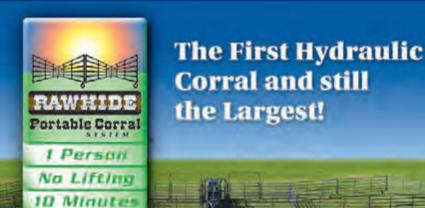

www.meadowlark.k-state.edu.

the Kansas Department of Agriculture and American International Charolais Association hosted a delegation of Costa Rican beef sector stakeholders. The delegates were nominated by the Costa Rican National Institute of Innovation and Transfer in Agricultural Technology (INTA) and included: Allen Monge, Lajitas de Buena Vista S.A.; Juan Carlos, Perla del Río Góngora Co.; Ronnie Cobb, Biofeed Genética; and Franz Heinsohn, Pradera del Norte. KDA was represented on the trade mission by Suzanne-Ryan Numrich, international trade director, and Shirley Acedo, agribusiness development coordinator. David Hobbs, director of activities, represented the American International Charolais Association (AICA).

In early December 2019,

The reverse trade mission was the result of a joint project that INTA, AICA, the Montana Department of Agriculture and KDA have been working on since early 2013. The main objective of the project was to improve and expand the Costa Rican beef cattle herd while increasing the opportunity for the sale of U.S. beef cattle genetics.

The multi-year project used Charolais and Red Angus semen for artificial insemination of native Costa Rican cattle, primarily Brahmans and Nelores, to create F1 crosses. Performance data including birth weight, weaning weight and carcass weight were collected on the calves in order to compare the U.S.sired calves with the Costa Rican-sired calves.

"The U.S.-sired calves had faster rates of growth and higher quality carcasses compared with the native calves," reported Ryan-Numrich. "Higher quality beef is increasing in popularity because of a growing number of middle-class consumers and booming tourism sector. By utilizing U.S. genetics to produce F1 crosses, Costa Rican

A delegation of Costa Rican beef sector stakeholders visit the Smoky Y Ranch Red Angus in Monument, as part of a reverse trade mission in December, including (from left) Juan Carlos, Kelly Younkin, Randall Younkin, Cody Younkin, Daniel Vega, Ronnie Cobb, Allen Monge, Suzanne Ryan-Numrich and Franz Heinsohn.

cattlemen can improve the efficiency of their calves while producing more desirable and higher quality beef."

The team started the reverse trade mission by attending a beef cattle industry educational seminar at AICA and ended the week at the Wright Charolais 9th Annual Female Sale in Kearney, Missouri. Other ranch visits included: Cody Cattle Company, Scandia; Fink Beef Genetics, Randolph; Hubert Charolais Ranch, Monument; Mushrush Ranches, Strong City; Nextgen Cattle Co., Paxico; Overmiller Red Angus and Gelbvieh, Smith Center; Schrader Ranch, Wells; Schumacher Trust Ranch, Hays; Smokey Hill Charolais, Hays; Smoky Y Ranch Red Angus, Monument; and T&S Strand Charolais, Formoso.

"The trade mission provided the Costa Rican cattlemen an opportunity to view Kansas beef cattle genetics in working ranch environments. Kansas seedstock producers that hosted the cattlemen provided answers to many questions from the delegation from calving ease to feedlot performance," said Hobbs. "From my point of view, the Costa Rican cattlemen traveled home with solid interest in utilizing Kansas seedstock genetics to improve the efficiency and performance of their bos indicus based cowherds."

The trade mission was organized by KDA and AICA and funded in part by U.S. Livestock Genetics Export, Inc. (USLGE). KDA strives to encourage and enhance economic growth of the agriculture industry and the Kansas economy by exploring and expanding both domestic and international marketing opportunities. The Kansas Ag Growth Project identified the beef sector as a key component for state growth.

KDA is offering two upcoming opportunities to Kansas farmers, ranchers and agribusinesses to participate in State Trade Expansion Program (STEP) grant trade missions planned for 2020: VIC-TAM Asia/Petfood Forum Asia, Bangkok, Thailand, March 24-26; and NAMPO Harvest Day, Bothaville, South Africa, May 12-15. Interested persons should contact Suzanne Ryan-Numrich at suzanne.numrich@ks.gov or 785-564-6704.

## The importance of data for commercial cattlemen

By Radale Tiner,

American Angus Association We have all heard people talk about the importance of data, but have you ever given much thought to how important data truly is? In my nearly eight-year span of being a regional manager for the American Angus Association, I have discovered that many breeders do not fully understand how to take advantage of the data that is available for commercial producers. I hope to share with you how to use the tools available to make more accurate breeding decisions.

One simple tool that I use every day is the pedigree lookup tool. This tool can be found under the management tab on www.angus.org. When you are looking to purchase a bull or to breed to a bull by artificial insemination (AI), it is always a good idea to see how accurate the expected progeny differences (EPDs) are on that bull. If you are breeding heifers, it might be wise to look at the accuracy of calving ease direct (CED). This would help if you are looking at two bulls with the same CED EPD value, but one bull has a .05 (5%) accurate EPD and another bull has a CED with a .46 (46%) accuracy. You will have fewer surprises with the bull that has a 46% accurate EPD, as opposed to the bull with only 5% accuracy.

The other part of this tool that is very useful for commercial breeders is seeing how the EPDs have changed since you purchased the bulls. Often commercial producers use the original EPDs that were printed in the sale book or what was printed on the original registration papers they received after buying the bull. The American Angus Association updates EPDs every Friday morning. Sometimes there is minimal change, while other times, when a lot of data has been submitted, we might see significant changes for particular traits.

This is real data at your fingertips, provided to you by the American Angus Association. There is importance of data. The more data that you use when making breeding decisions within your own herd will result in fewer surprises in your calf crop. I encourage all cattlemen to visit with their Angus regional manager for more information on how to utilize this data.

#### Predictions for the 2020 U.S. rural economy include challenges for rural economies The U.S. rural economy leading economies hope to the late-stage expansion going markets will continue to face in exports will be critical to ous and more vehement call

will continue to face headwinds in 2020 and is expected to underperform relative to the economy of urban America. Since 2014, GDP growth in rural counties has averaged almost 1% less than in urban counties. That trend is likely to continue without a significant upswing in agricultural commodity prices, energy exploration, rural manufacturing and other industries upon which rural economic growth depend.

Despite that bearish prognosis, there is room for optimism, according to a comprehensive 2020 outlook report from CoBank's Knowledge Exchange division. The U.S. farm economy has demonstrated its resiliency in the face of trade wars, extreme weather and other disruptive events. While the downside effects of trade disputes and tariffs will remain severe for many, some ag sectors will see stronger exports and higher prices. Rising animal protein and dairy exports will be a bright spot for producers in 2020.

Despite that bearish prognosis, there is room for optimism, according to a comprehensive 2020 outlook report from CoBank's Knowledge Exchange division.

"Most current signals indicate the overall domestic economy is on firm footing, thanks almost exclusively to the consumer," says Dan Kowalski, vice president of Co-Bank's Knowledge Exchange division. "However, without a meaningful U.S.-China trade deal, the U.S. agricultural economy will continue to struggle with uncertainty in 2020."

The CoBank 2020 outlook report examines 10 key factors that will shape agriculture and market sectors that serve and affect rural communities throughout the United States.

## Global economy: Less trade, slower growth

After a year of trade tensions, declining GDP and the slowest global economic growth since the depths of the financial crisis, the world's leading economies hope to turn the page in 2020. The prognosis, however, offers little to support such optimism. Consumer strength the world over has prevented further slowing in the global economy. The direction and severity of the U.S.-China trade dispute will continue to have the most significant influence on the world economy in 2020. A leveling-off of trade tensions would allow global economic growth to bottom out in early 2020 before showing signs of life later in the year. However, the vulnerable state of the global economy makes it susceptible to contraction if trade conditions worsen.

## U.S. economy: Expansion for those left behind

The U.S. economy will enter 2020 decisively split powered by a resilient and confident consumer but hamstrung by a risk-averse business sector that has stopped investing. Now that stimulus effects from the 2017 tax reform and the 2018 spending bill have faded, the economic expansion will show its age, losing steam in the coming year. There is evidence that since 2017 more people, including those in rural communities, have broadly shared the benefits of economic growth, despite the continual rise in wealth inequality.

#### Monetary policy: Sustain and prepare

All eyes will be on the central banks as the world inches closer to the end of the longest period of economic growth in history. Japan and Europe are still stimulating their economies with negative interest rates and quantitative easing. After three rate cuts in 2019, the U.S. Federal Reserve is holding a more conservative stance with its target rate near 1.5%. China has the most room to maneuver with its short-term rate just under 3%. All these accommodative stances are made possible because inflation remains inexplicably low despite tightening labor markets. Federal Reserve Chair Jerome Powell's role in 2020 is to keep

the late-stage expansion going while simultaneously preparing for the recession that will arrive sooner or later.

#### U.S. government: Policy and trade up in the air

Ag policy at the federal level has been wrought with uncertainty and volatility. The trade environment for 2020 remains hazy as well. Beyond a possible U.S.-China phase one deal, more progress with China will be a challenge. As a result, it is difficult to see trade as a bright spot in 2020. The current atmosphere in Washington has given way to progress on ag labor legislation and the United States-Mexico-Canada Agreement (USMCA). However, a protracted partisan fight over impeachment is on tap in the Senate. This rancor makes it difficult to advance legislation that helps agriculture, which would give either side a win for the hotly contested 2020 election. Market Facilitation Program payments to farmers helped make up for persistently low commodity prices in the last year.

#### U.S. farm economy: Trade uncertainty lingers

Without a substantive U.S.-China trade deal, the U.S. ag economy will continue to struggle with trade uncertainty in 2020 as questions linger as to whether USDA will continue to soften the blow of the trade war for farmers and ranchers with government payments. Amid persistently low commodity prices and rising costs, U.S. farmers and ranchers continue to struggle with low and declining working capital. Farm debt, already at record levels, is expected to continue climbing, as credit quality in farm loans declines, particularly for grain and dairy producers. However, stable farm real-estate values have helped farmers. The resiliency of farmland values, despite the steep drop in net farm income over the years, has allowed farmers to restructure debt and address tight cash flow and liquidity crunches.

Specialty crops: Labor and water in the spotlight Fruit, nut, and vegetable markets will continue to face rising production costs in 2020 due to mounting regulations, particularly as they relate to controls over groundwater in California. Regulations under the state's Sustainable Groundwater Management Act (SGMA) are about to go into effect and could potentially cause acreage shifts between crops of varying water needs. Other government action in 2020 could have a favorable impact on specialty crop growers. The Farm Workforce Modernization Act currently being debated in Congress is a hopeful sign for an improved regulatory environment for ag labor. If passed, it would help ease the tight labor supply plaguing agriculture.

Grain, farm supply and biofuels: Time to transform

Challenges for the grain sector will persist in 2020, fueled by commodity price pressure, policy uncertainty and export weakness amid growing global supply abundance, especially for corn and soybeans. U.S. wheat producers and exporters, though, may benefit from an improved export pace in 2020 with the Russian wheat crop struggling. Biofuels also face challenges in 2020. U.S. ethanol production, according to the U.S. Energy Information Administration, is expected to fall by 1.9% in 2019 to 15.8 billion gallons and remain flat in 2020. The outlook for farm supply companies is mixed and continues to be heavily influenced by weather. To improve its value proposition, this sector is actively pursuing vertical and horizontal consolidation.

#### Dairy and animal protein: Exporting your way to success

With dairy and animal protein production looking toward another year of increased production in 2020, a rebound in exports will be critical to profitability in both sectors. Per capita consumption of animal protein in the United States will likely set a new record in 2019. Overall dairy consumption in the United States will remain strong in 2020 as Americans continue eating more cheese and butter, but fluid milk will likely continue its long-term decline. Strong demand and rising exports, though, will not erase financial stress at the farm level. Producers of beef, pork. poultry, and dairy will likely experience stress from higher feed costs due to lower crop yields this fall.

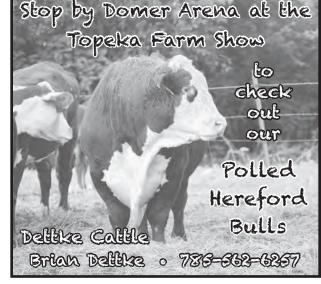

#### Rural electricity: Demand grows for cleaner, lower-cost power

Companies throughout the electricity supply chain are likely to face heightened, simultaneous demands for cleaner and less-expensive power generation in 2020. These pressures reflect the intense popular concern about climate change, wealth and income inequality, and slowing economic growth - three issues which Americans rank as equally important in recent polling. In many rural communities, these concerns are likely to manifest in more numerous and more vehement calls for greater renewable power generation. For utilities, the task of justifying multi-million-dollar expenditures on new renewable resources will be easier in 2020 as the unsubsidized costs of solar, wind, battery energy storage, and flexible natural-gas-fired resources continue to decline.

Page 9

#### Rural communications: Investors have come to buy

Rural and regional telecommunications operators will become targets in 2020 for investors and strategic buyers as the pool of available mid-sized fiber transport companies dries up. Demand for these companies has been so strong that valuations are reaching levels that were unthinkable a few years ago. Mergers and acquisition activity in rural markets should be brisk as the growth in data traffic offers attractive returns for investors, and opportunities for strategic buyers to gain scale and access to new markets. 2020 will also bring the launch of the Rural Digital Opportunity Fund (RDOF), the latest broadband incentive program from the Federal Communications Commission and its largest effort to close the urban-rural digital divide.

## Get the dirt at Soil Health U & Trade Show Jan. 22 and 23

Get the dirt on regenerative agriculture at the 2020 Soil Health U & Trade Show, Jan. 22 and 23. The full schedule is available now at www.soilhealthu.net. With two days of expert speakers, producer panels, a trade show with equipment demonstrations, and sessions tailored to a wide variety of soil health questions, there's education for farmers and ranchers of all shapes, sizes and regionality at this third year of Soil Health U. Speakers like Adam Chappell will discuss the economic benefits of soil health to farm operations, while others like Brian Alexander will help cattlemen understand that pastures need soil health too. New this year is a special breakout session of women leaders in soil health, to talk about how women on the farm can lead the way toward improved soils and profits for their family farms and ranches. Keynote speakers include: Ray Archuleta, agroecologist and founding partner of Understanding Ag; Lance Gunderson, president of Regen Ag Lab; and Reginaldo Haslett-Marroquin, president and CEO of Regenerative Agriculture Alliance. Soil Health U registration is open, at www.soilhealthu.net. Registration is \$125. Student Registration is just \$50. Planning to bring a group of neighbors to Soil Health U? Call 620-227-1834 and ask about discount registrations for parties of 5 or more on the same payment.

Grass & Grain, January 7, 2020

For most of 2019, I had no idea what day it was. I have been blessed to have many adventures with family and friends and to have meaningful work. Thus, no two days have been the same. Except for Wednesdays. Wednesdays are deadline days for Grass and Grain. And Mondays. Mondays are deadline

days for Around Kansas. And Tuesdays. Tuesdays are sale barn days at Wakeeney Livestock. Sometimes, I luck out on those days and know what day it is.

As my older daughter has said many times, there is real time, and there's "Debbie Time." Rarely do the two line

## Kansas hog inventory up four percent

Kansas inventory of all hogs and pigs on December 1, 2019, was 2.14 million head, according to the USDA's National Agricultural Statistics Service. This was up four percent from December 1, 2018, and up three percent from September 1, 2019.

Breeding hog inventory, at 180.000 head, was up six percent from December 1, 2018, and up three percent from last quarter. Market hog inventory, at 1.96 million head, was up four percent from last year, and up three percent from last quarter. The September -November 2019 Kansas pig crop, at 968,000 head, was

up four percent from 2018. Sows farrowed during the period totaled 90,000 head, up six percent from last year. The average pigs saved per litter was 10.75 for the September -November period, compared to 10.90 last year.

Kansas hog producers intend to farrow 89,000 sows during the December 2019 - February 2020 quarter, up three percent from the actual farrowings during the same period a year ago. Intended farrowings for March - May 2020 are 91,000 sows, up six percent from the actual farrowings during the same period a year ago.

## **OFFERED FOR SALE BY SEALED BID**

Farm Real Estate: Blackjack Rd and 170th Rd Denton, KS. 160 acres m/l, Wolf River Township Doniphan County, KS. From the Barbara L. Craft Revocable Trust by Barbara L. Craft

Sale will be done by 1031 exchange

Bids to be mailed to: Barbara Craft 3687 Deep Creek Rd. Manhattan, KS 66502 Deadline for Bids: January 10, 2020

Closing no later than February 10, 2020.

Farm has been Fall sprayed and 220lbs of anhydrous applied.

#### All bids must reflect:

#### The Real Estate legal description.

-The total amount bid for Real Estate/chemical application.

-The address, phone number, contract information of bidder. -Bidders signature and date.

Terms: 10% down upon execution of contract with balance in full on closing. Seller will furnish good and merchantable title. Seller and Buyer will share equal title insurance and closing costs.

#### Legal description:

The North West Quarter (NW1/4) of Section Thirty-Three (33) Township Three (3), Range Nineteen (19) containing 160 acres m/l

Seller reserves the right to reject any and all bids. All bidders will be notified relative to property owner's decision regarding acceptance/rejection of their bid. Successful bidder must sign contract/make down payment within three days of notice that their bid has been accepted.

## 470± Acres of PRATT COUNTY, KS AND AUCTION

I used to claim the eccentricities of the creative mind, but the fact is I just can't tell time and I can't keep up with it either. I recall that in the first grade I had chicken pox the week we were learning the clock. I do use that as an excuse on occasion (I also recall Daddy's trying to help me with the clock to make up for this "lost time" from school. I also recall how difficult the quarter hours were for me to grasp. And I recall asking Daddy what a "quarter of" meant. How do you know if it's before or after, I asked. Thinking about it now I get confused all over again...).

The year I started first grade, my aunt Emma Lee graduated from high school that May. We lived on the

Farm bill meeting details finalized

By David G. Hallauer, Meadowlark District Extension agent, crops & soils/horticulture

ARC or PLC? The acronyms associated with the 2018 Farm Bill aren't much different than they were five years ago. What's changed is the current farm economy, and another farm bill sign-up means a chance to evaluate options in light of that change in farm economics.

To help sort out some of the details, as well as provide tools that might help producers evaluate their ARC/PLC options, six Farm Bill education meetings have been scheduled across the Meadowlark Extension District.

Meetings will be held at both 10:30 a.m. and 1:30 p.m. on January 14, 15, and 16. On Tuesday, January 14th, we'll be at the Jackson County Courthouse Meeting Room located in the NW corner of the ground floor of the Courthouse on the square in Holton. The Nemaha County Community Building, 1500 Community Drive, Seneca, will be the host for our meetings on Wednesday, January 15th. Thursday, January 16th, we'll be at the Oskaloosa City Hall Meeting Room located at 212 W. Washington Street in Oskaloosa. Each meeting will last just over an hour, with presentations by local Extension staff and county FSA directors sharing information on enrollment details and aids to help you in the decision-making process.

An RSVP is requested 24 hours in advance of the meeting you plan to attend if possible for handout purposes. Walk-ins are welcome. RSVP to your local District Extension Office (Holton: 785-364-4125/Seneca: 785-336-2184/Oskaloosa: 785-863-2212) or e-mail to me at dhallaue@ksu.edu. Information will also be available at www.meadowlark.k-state.edu under the Crops & Soils Link.

'Staying Competitive in the Swine Industry' is theme for 2020 K-State conference

Kansas State University's 2020 Swine Profitability Conference is planned for Tuesday, Feb. 4. This year's event will be hosted at the Stanley Stout Center in Manhattan.

Each year the Swine Profitability Conference focuses on the business side of pork production. "Important swine business topics of risk management, pork demand, value-added production, and biosecurity will all be discussed this year," said Mike Tokach, K-State Department of Animal Sciences & Industry distinguished professor and swine Extension specialist. "This conference is designed for producers to increase their competitiveness in today's swine industry."

The conference will feature speakers from an array of swine-related businesses and organizations, including:

Bob Taubert, managing partner at New Horizon Farms, will address the approach to risk management.

Joe Kerns, Kerns and Associates, will discuss the world meat dynamics and U.S. pork price outlook for 2020.

Kaden and Emily Roush, R Family Farms, will share their story of raising pigs in north central Kansas.

Dr. Daniel Linhares, Iowa State University, will talk about ways to prevent, control and eliminate swine infectious diseases.

Okay, maybe not the most

debgoodrich@gmail.com.

Time" regardless.

Dr. Steve Dritz, Kansas State University, will focus on the past, present and future of bio-security.

"We feel the speakers for the 31st Annual Profitabilitv Conference are industry leaders with diverse backgrounds and understanding of the swine industry," says Joel DeRouchey, K-State Extension swine specialist. "They will provide take-home information for swine producers and allied industry partners alike."

The conference will take place at the Stanley Stout Center, 2200 Denison Avenue. The day begins with coffee and donuts at 9:15 a.m. and the program starting at 9:30 a.m. Lunch is included in the conference, which will end at 3

Pre-registration is \$25 per participant and due by Jan. 24. Attendees can register at the door for \$50 per participant. More information, including online registration, is available at KSUSwine.org or contact Lois Schreiner at 785-532-1267 or lschrein@ksu.edu.

WEDNESDAY, JANUARY 15, 2020 - 1:30 PM

#### SELLER: JEREME & DIANE HOUSE

TRACT 1: Legal: The SW4 of Section 36, Township 28, Range 12 Pratt Co. KS.

Located: From Isabel, KS go 6 mi. North & 1 mi. West. Watch for Signs. Land Desc: Irrigated Quarter with 2004 Valley 8000 system. Has a 1997 JD 4039T engine. 1,000 gal. diesel tank & 1,600 gal. fertilizer tank. Water Right No. 26,146 with 195 Acre feet of water at 850 GPM. Corners in Wildlife Enhancement CRP @ \$46.88 per acre on 31.76± acres. The annual Payment for this is \$1,488.00. Contract expires on 9-30-2030. Taxes: 2018 \$3,281.33±, Groundwater man gement \$400.85±

#### agement \$400.85± TRACT 2: Legal: The SE4 of Section 36, Township 28, Range 12 Pratt Co. KS.

Located: From Isabel, KS go 6 mi. North & 1 mi. West. Watch for Signs. Land Desc: Irrigated Quarter less a 5± acre tract in SW corner 2008 Valley 8000 system with a Cummins 3.9 L 4BTengine, a 1,600 gal. fertilizer tank. Water Right No. 32,593 with 198 Acre Feet of vater at 850 GPM. Three corners are in the Wildlife Enhancement CRP at \$46.88 per acre on 22.81± acres. Annual payment for this is \$1,069.00. Contract expires on 9-30-2030. Taxes: 2018 \$3,281.33±, Groundwater management \$400.85±

#### TRACT 3: Legal: The NW4 of Section 7, Township 29, Range 11 Pratt Co. KS.

Located: From Isabel, KS. 5 mi. North & 1 mi. West. Watch for Signs Land Desc: Irrigated Quarter less 2± acres in the NW corner. 1990 Valley 6000 System with a Cummins 3.9 L 4BT engine, 1,000 gal diesel tank & 1,600 gal. fertilizer tank. Water Right No. 39,215 with 195 Acre Feet of water at 800 GPM. Three corners are in the Wildlife Enhancement CRP at \$46.49 per acre on 15.47± acres. Annual payment for this is \$719.00. Contract expires on 9-30-2030. Taxes: 2018 #2,999.42±, Groundwater management \$397.20. Ten Acre tract Seller is McInteer Family Trust.

#### The Following applies to all Tracts:

Taxes: 2020 Taxes prorated to day of Closing. 2019 taxes and any previous years paid by the Sellers. Earnest Money: \$25,000.00 down day of sale on each tract. Balance on Closing Day in the form of Certified Funds. Copy of APH & Production report in the office. Mineral Rights: Sellers mineral interest passes to the Buyer. Possession: On Closing. Closing: Or or before Feb. 17th, 2020. CRP: CRP payment prorated to day of closing Buyer will comply with FSA rules and regulations concerning CRP maintenance etc. Title Ins. & Escrow Agent Closing Fee: Split 50% Buyer, 50% Seller. First American Title Pratt KS. is Escrow Agent and Title Insurance Company. Information concerning above properties: All 3 irrigation systems have had Winter Service/Pre Season Service. All 3 irrigation systems have AG Sense monitors that stay with the systems. All 3 irrigation systems have had wheel tracks filled. All 3 irrigation systems roads to pivots have been rocked. All 3 irrigation systems are excellent candidates for electric conversions. Some initial work has already been done. Pumping plant evaluation & energy audit has been done. SW4 of 36 & NW4 of 7 the engines are in good condition, serviced and maintained well according to the seller. SE4 of 36 Engine is in need of a new head or replaced. 1 year left on the Conservation Stewardship Program which is transferable to the Buyer. Has been no-tilled for the past 20± years. Fertility has been managed through 2 1/2 acre grids since 2012, last time grids were pulled was 2018. This data can be transferred to the new Buyer.

### SATURDAY, JANUARY 25, 2020 - 2:00 PM

Barnes Fire House — BARNES, KANSAS

**157.2± ACRES WASHINGTON COUNTY LAND** egal Description: NE 1/4 Sec. 27 Twp. 04S Rng. 05E 6th P.M. Tract Description: This gently rolling farm is approximately 80% in production with primarily Crete and Mayberry soils, considered prime farmland. There is approximately 37 acres of wheat planted this fall which the buyer will receive the landlords (40%) share. All other ground is open to spring crops.

CRP: 13.73 acres \$1,139 annual payment. Expires: 10/1/2023. Sellers approx. 80% share to transfer to new owner.

DCP Cropland: 126.25 acres

Base Acres: Wheat 42 Acres Yield 35 Bu. Grain Sorghum 70.50 Acres Yield 90 Bu.

**2019 Tax Information:** \$2,699.00

Property Location: From the corner of Hwy 9 & Hwy 148 (approx. 1/2 mile East of Barnes KS) go South on All American Rd. 1 1/2 miles to 8th Rd. then East 1 mile. This is the Northeast corner of the property.

Listing Broker's Notes: This quarter section of ground offers good soil types with the ability to add more quality acres of farmland. The diversity of the farm (Cropland, CRP, hay meadow) would help diversify the income stream for an operator or investor. This is a good quality property that has been well taken care of. Don't miss this great opportunity to expand your portfolio or land holdings. Contact me direct with any questions you have on this great Washington County Kansas property. Mark Uhlik, Broker - 785.747.8568

January 20 (Monday) -

## **Pruning Fruit Trees This Winter**

Perhaps you were fortunate to get a new pruning tool for Christmas. A previous article encouraged sharpening and keeping your tools functioning. New or old tools can be put to use pruning fruit trees now when the weather is cooperative.

Fruit trees need pruning to create strong limbs that can support a plentiful fruit crop. Some fruit trees require extensive pruning every year, while others need very little. Gardeners may be reluctant to prune without understanding basic principles and objectives. These can be found and learned through K-State Research and Extension.

Two new publications have been developed to aid in guiding fruit tree pruning. These are "Pruning Apple and Pear Trees" and "Pruning Peaches, Plums, Cherries and other

Stone Fruits." An on-line video is another resource. All can be found on the ksre.ksu. edu website.

Pears are the most dependable fruit producer. They bloom late enough to not often be damaged by frost. Pruning is minimal and done to encourage lateral branch growth. Spreading the branches to provide a more open canopy by use of braces or supports is commonly required.

Peach trees require the most pruning. Fruit buds are formed on last year growth. Annual pruning to remove 50 percent of the tree stimulates growth for those fruit buds. Stone fruits like peaches often bloom prior to the last frost, damaging fruit production. Pruning after bloom to remove fruitless branches will benefit the owner.

Many fruit tree owners are

a little leery about pruning on their tree. You won't go wrong by pruning to open up the tree canopy. Any mistakes can be fixed with ongoing tree growth. Some pruning is going to be better than none.

Management of fruit trees is constant. The majority of pruning is done while the tree is dormant. Some pruning is likely necessary during the growing season.

You can find out more information on this and other horticulture topics by going to the K-State Research and Extension website at www. ksre.ksu.edu.And you contact Gregg Eyestone at the Riley County office of K-State Research and Extension. Gregg may be contacted by calling 537-6350 or stopping by 110 Courthouse Plaza in Manhattan or e-mail: geyeston@ksu. edu

Grass & Grain, January 7, 2020

## Cow Disturber

McGraw posed an interesting question. If a cowboy herds a herd of cattle, we call him a herder. If a sheepman herds a flock of sheep, he's still a herder. Why isn't he called a flocker?

Oley has always referred to himself as a cow disturber. I think that is an accurate description of what cowboys do. The definition of disturb is: to annoy or disrupt.

"Where ya goin', Bill?"

Cradles can be lifted w/one hand • Cradles are removable Safety locks for cradles in both the up & down positions, located at the front of trailer

1-Year Mfg. Warranty on axles & tires • 2-Year Warranty on trailer Heavy duty tubular construction

10-bale trailer has 7,000 lb. tandem axle with brakes & 10 ply tires

12-bale trailer has 10,000 lb. tandem dual axle w/brake & 10 ply tires 14-bale trailer has 12,000 lb. tandem dual axle w/brake & 14 ply tires

Comes with a spare tire

"I'm gonna go check the cows." Which really means, "I'm gonna ride into the bunch, git 'em all up, turn'em around and just generally annoy and disrupt them."

I grant there are occasions when we have a certain definite task in mind; i.e. "I'm gonna bring in that cow with the arrow in her side." Or, "Saddle up, we're pushin' 2600 head of Longhorns to the sale barn in Bloomfield."

But most of the time we're just disturbing them. Like doting parents or cat fanciers, we take any excuse to fuss over the critters in our care. It's a wonder whitetail deer or jackrabbits aren't extinct with no one to molest them regularly.

If we were honest with ourselves, our language would be more forthright. The cattle foreman in the feedlot might give his instructions like this... "Jason, I want you to enter the first pen in the north alley. Unsettle the steers by sitting quietly for a moment. Next upset them by approaching. Confuse them by weaving back and forth, agitating and irritating them constantly. Badger each one until they've all gotten up and

milled around. Once you're convinced you've stirred them up sufficiently, you may go disturb the next pen."

Or, the cowman might say to his wife, "Darlin', while I'm at the board meeting I'd like you to torment the heifer in the barn lot every 20 minutes. She's trying' to calve. Peek over the fence and bother her. Shine the light in her eyes to break her concentration. Worry her as often as needed, and when I get back I'll slip in and frighten her into calving."

In fairness, we are doing what all good shepherds do. We watch over our flocks because that is our calling. We stand guard in case any should need our help. But if truth in labeling is ever applied to our job descriptions, we will have to be more specific about what we do.

So the next time somebody asks what you do, try one of these on for size: herd rearranger, bull nudger, sheep panicker, mule cusser, equine perplexer, steer beautician, hog motivator, Holstein therapist, cow companion, dog shouter or cowboy coddler.

www.baxterblack.com

## Kansas cattle on feed up three percent

Kansas feedlots, with capacities of 1,000 or more head, contained 2.43 million cattle on feed on December 1, according to the USDA's National Agricultural Statistics Service. This inventory was up three percent from last year. Placements during November totaled 415,000 head, up four percent from 2018. Fed cattle marketings for the month of November totaled 395,000 head, up three percent from last year. Other disappearance during November totaled 10,000 head, down 5,000 head from last year.
