

Grass & Grain Community Obituary

WILLIAM "Bill" L. RAINE 1942-2020

William L. "Bill" Raine, 77, passed away Wednesday, September 23, 2020, at his home. He was born in Topeka on October 4, 1942, the son of Otto M. George Jr. and Ruth Mae Schlotz George.

Bill lived in the Maple Hill area most of his life and graduated from Maple Hill High School. He worked at Goodyear Tire and Rubber, retiring in 1997. In 1986, Bill pursued a desire to follow his dad's profession and attended World Wide Auctioneer School at Mason City, Iowa. This profession he followed until 2019. He also loved the cowboy life, which he fulfilled by owning his own cow herd. Caring for the mother cows and enjoying the calving season were a joy for him. Bill was a member of the Maple Hill Community Congregational Church.

Bill was preceded in death by his parents, Joe and Ruth Raine; his father, Otto George Jr.; a son, William Todd Raine and a great-grandson Ryan Herrin.

William L. "Bill" Raine and Linda Sue Ungeheuer were united in marriage in Topeka on April 18, 1961. She survives of the home. Other survivors include his son, Troy of Topeka; his brother, Arthur (Tamara) Raine, Harrison, Ark.; his sister, Ruth Ann (Don) Rogers, Topeka; four grandchildren, Erica (Matt) Herrin, Levi (Whitney) Raine, Tasha Raine (Jim Weir), Tamara Raine (Josh Hartman); seven great-grandchildren, Corwin Weir, Jaycee Herrin, Liam Hartman, Quinton Herrin, Talan Weir, Hinsley Raine, and Kelton Raine; three step-great-grandchildren Preston Hartman, Gavin Hartman, and Xander Meyers.

Graveside services were held at the Maple Hill Cemetery followed by interment.

Board Leadership series planned for February

K-State Research and Extension is conducting a series of virtual Board Leadership workshops over the lunch hour for two weeks this February 16, 18, 23 and 25.

Designed to provide basic training for members of community-based boards, the series will be hosted by local Extension professionals from the Southwind and Wildcat Extension Districts, and participants are invited to join from any remote location of their choice.

Informed and committed board members are the key to healthy, effective boards and committees in our Kansas communities. K-State Research and Extension's Board Leadership Series will provide an opportunity for board members to learn the basics of being a good board member. Whether you are a member of a church board, a township board, a nonprofit agency board, or a rural water board, this training is appropriate for you.

The series will kick off on February 16 with Organizing/Leading Effective Meetings. During this session, participants will learn about their roles and responsibilities as a board member, basics of parliamentary procedure, and strategies to make meetings more productive and effective.

On February 18, the topic will be Generations & Behavioral Management. This session will explore how personalities and generational differences affect the decision-making process.

The February 23 session will cover Understanding Fellow Board Members and Conflict Management. Participants will learn how to manage conflict in a way that is productive, not destructive, to the board.

Strategic Planning will be the final topic on February 25. Participants will learn about establishing a common mission and vision for the board, and how to plan priorities for the future.

All sessions will be conducted from noon to 1:00 p.m. Workshop participants will meet virtually and upon registration, will receive a link to participate in the live, web-based discussion.

Pre-registration for the event is required by February 12, 2021. The cost of \$20 covers all four sessions for one board member. Each registration buys a seat, which can be rotated by participants. Registration also includes a copy of the meeting materials, which will be mailed prior to the workshop.

Registration is available at www.bit.ly/Board-Leadership2021 or by visiting to www.wildcatdistrict.ksu.edu. If you have questions or would prefer to register by phone, please contact Frances Graves at the Wildcat Extension District, 785-331-5378.

For more information, contact Frances Graves, District Director & Community Vitality Agent, francesgraves@ksu.edu, 785-331-5378.

Ogallala Aquifer Virtual Summit to engage stakeholders in tackling tough questions

At 8 a.m. CST on February 24 and 25, producers and other water management leaders will grab their coffee cups, fire up their devices, and wade into a series of highly interactive conversations designed to tackle several tough questions faced by communities that rely on the declining Ogallala aquifer resource. For example, what on-farm, district, or state-level decisions and policies could support shifts in water management to ensure future generations will be able to continue to farm and live in the Ogallala region? What can be done so that rural communities remain vital in parts of the region where aquifer depletion means irrigated agriculture will no longer serve as much of an economic backbone in coming years or decades?

This event is being led by the USDA-NIFA Ogallala Water Coordinated Agriculture Project (OWCAP) team, along with the Kansas Water Office, Texas A&M AgriLife, and the USDA-ARS supported Ogallala Aquifer Program, and support from individuals in all eight Ogallala states. Between the pandemic, an extended period of drought, and lower commodity prices, summit organizers wondered if producers and other

water management leaders would be inclined to meet virtually. Together, they assessed that the value of this event, which encourages people to meet one another and exchange a wealth of practical and technical expertise, would not be diminished if held online. In fact, more than ever, having an opportunity to help people connect and hear from one another and from producers in particular on many important dimensions of the water-dependent future of this region, seemed right and necessary. This event will serve as the capstone outreach event for OWCAP, an interdisciplinary, collaborative research and outreach project underway since 2016 involving researchers from nine institutions based in six of the eight Ogallala states.

Topics covered during the summit will include updates on projects, new programs, activities and policies that were inspired at least in part due to an earlier eight-state Ogallala summit event held in Garden City, Kansas in April of 2018. Together, participants will share their expertise and identify opportunities and gaps requiring attention, resources, and expanded collaboration within and across state lines to benefit

agriculture and the region's communities.

"The increasing depletion of the Ogallala Aquifer is one of the most daunting water problems in America. Extending and restoring the life of this resource, and, in turn, the economies and livelihoods that depend on it, will require collaboration across a diverse range of water-focused stakeholders and entities," said Connie Owen, director of the Kansas Water Office. "This summit will provide a unique opportunity to foster and strengthen that collaboration. It will cover emerging innovations, research, and policies as well as help identify opportunities for working together across state lines to address the water-related challenges facing this region and its communities."

Registration for the summit costs \$40; the fee for producers and students attending the two-day event is \$20. Participants from each of the eight states overlying the Ogallala aquifer will be represented: South Dakota, Nebraska, Kansas, Colorado, Wyoming, Oklahoma, New Mexico, and Texas. A detailed schedule of this event is available at <https://www.ogallalawater.org/>. Members of the media are invited to attend.

"Winning The Game" Corn Marketing Workshop to be held Feb. 23

By James Coover, Crop Production agent, Wildcat and Southwind Extension District

K-State Research and Extension presents "Winning-The-Game" Corn Marketing Workshop to be held Tuesday, February 23rd, 2021 at the Neosho County Fairground Community Building in Erie from 9:30 a.m. to 2:30 p.m. This corn marketing workshop will focus on devel-

oping pre-harvest marketing strategies for the 2021 Kansas Corn crop. The emphasis will be on using cost of production and seasonal price trend tendencies to develop seasonally flexible marketing plans for Kansas farmers. A variety of marketing tools will be used in the workshop including forward, basis and hedge-to-arrive contracts, short futures hedges, and put/call

options. While focusing on corn, lessons learned can be used across all commodities.

Instructors for the workshop are Mark Nelson, director of commodities for the Kansas Farm Bureau, and Daniel O'Brien, Extension agri-

cultural economist, Kansas State University. Pre-register by contacting any of the following Wildcat or Southwind Extension District offices: Girard (620-784-8233) or Erie (620-244-3826). Preregistration cost is free, but there will be a \$5 registration fee

at the door. Attendance is limited to the first 30 registrants to be within COVID-19 safety guidelines. The workshop series is sponsored by Kansas Farm Bureau, and the North Central Extension Risk Management Education Center. Local spon-

sors for the Erie workshop include: Frontier Farm Credit, Community National Bank, and Home Savings Bank.

For more information, please contact James Coover, Crop Production Agent, jcoover@ksu.edu or (620) 724-8233.

Nebraska Cover Crop and Soil Health Conference set for Feb. 11

There are many benefits to utilizing cover crops, such as improved soil health and reduced erosion. It's the details of how and what to do that can present challenges. The Nebraska Cover Crop and Soil Health Conference will provide information to growers who are just getting started with cover crops and to those who are already making cover crops part of their operation.

The conference will take place on Thursday, Feb. 11 from 1:00 p.m. - 4:30 p.m. CST with in-person check-in at 12:30 p.m.

The conference will be webcasted from the University of Nebraska Eastern Nebraska Research and Extension Center (ENREC) near Mead, Neb. to other locations. In-person attendance is not available at ENREC due to COVID-19 restrictions. Registrants can take

part online or attend at the following locations with limited seating:

Beatrice, Southeast Community College (Academic Excellence Building), 4771 W. Scott Rd, Beatrice Neb. - Limit 30

Central City, Merrick Co. Fairgrounds, Central City, Neb. - Limit 50

Hastings, Adams Co. Fairgrounds, 947 S Baltimore Ave, Hastings, Neb. - Limit 100

Holdrege, Phelps Co. Fairgrounds, 1308 Second Street, Holdrege, Neb. - Limit 50

North Platte, University of Nebraska West Central Research and Extension Center, 402 W State Fair Road, North Platte, Neb. - Limit 28

Syracuse, Kimmel Ag Expo, 198 Plum St., Syracuse, Neb. - Limit 50

York, York County Fairgrounds - 4-H Bldg., York, Neb. - Limit 25

Topics and presenters include: Soil Sensing and Soil Health - Kristen Veum, research soil scientist at USDA-ARS Cropping Systems and Water Quality Research Unit, University of Missouri-Columbia; Optimiz-

ing Your Cover Crop ROI - Rebecca Clay, Strategic Initiatives Agronomy coordinator at Practical Farmers of Iowa; Using Aerial Imagery to Determine Cover Crop Impacts on Cash Crop Growth and Development - Dr. Andrea Basche, assistant professor, Agronomy & Horticulture University of Nebraska-Lincoln; Experiences and Economics Using Cereal Rye as a Cover Crop - Chad Bell, farmer; Pathway toward a Healthy and Resilient Soil to Achieve Optimum Productivity and Environmental Quality: Cover Crops are Key! - Jerry Hatfield, retired director, National Laboratory for Agriculture and the Environment; On-farm Research of Incorporating Cover Crop into a 3 Crop Dryland Rotation, Ken Herz, owner/operator of Herz Land and Cattle, and Cover Crop Panel - discussion with growers, landowners, and consultants.

Registration and details available at: <https://enrec.unl.edu/nebraska-cover-crop-conference/>.

There is no fee to at-

tend, but pre-registration is required. Day-of, walk-in registration will not be permitted. Early registration is encouraged as capacity limitations are in place at each location. Once a location is full, it will no longer be listed as a registration option.

In-person meetings will only be held if local and UNL-directed health measures allow and if road conditions are suitable for travel. If a site is canceled, registrants will be notified via email, phone, or text message.

Facial coverings/masks guidelines may vary based on local directed health measures. For information about the COVID-related health measures that will be in place at the meeting of your choosing, please contact the local site host. Contact information for each site host can be found at the web page above.

CCA credits are applied for and pending. Sponsored by Nebraska Extension, the Nebraska Soybean Board.

For more information contact: Melissa.Bartels@unl.edu or 1-402-367-7410.

Grass & Grain Community Obituary

WILLIAM (Bill) BROADIE 1948-2021

William (Bill) Broadie passed from his earthly life to his eternal heavenly home on January 21, 2021, after a six-week battle against COVID-19. Bill was born February 26, 1948 in Ashland, Kansas to Elmer (Raymond) and Leta (Luke) Broadie. Bill was a life-long resident of Ashland, Kansas, a fourth-generation cattleman and a proud United States Marine.

Bill graduated from Ashland High School in 1966. He then enlisted in the United States Marine Corps and was deployed to Vietnam in 1967. Bill was combat wounded and is a two-time Purple Heart recipient. He returned to Ashland and married Linda Kaye Clark, July 27, 1968. Bill graduated from Fort Hays State University in 1971 and returned again to Ashland to continue in the family ranching operation. Two children were born to this union, Barrett Broadie and Amy (Broadie) Deubig.

In 1988 Bill joined on with Superior Livestock Auction, a young company that was to revolutionize the cattle industry. In Bill's tenure with Superior Livestock Auction he and his team represented over 2.2 million head of cattle. In 2008 Bill and a group of close friends began a non-profit, the All-American Beef Battalion. The All-American Beef Battalion was started with the desire of showing gratitude to military men, women and families and to promote the beef industry. This all-volunteer team has served approximately 418,000 steak dinners to service members and families in 28 states. The family requests memorials be made to the All-American Beef Battalion, PO Box 458, Ashland, KS 67831

2021 Great Plains Growers Conference to be held online February 12-13

Mid-Missouri farmer Liz Graznak is one of the keynote speakers for the 2021 Great Plains Growers Conference, which will be held online Feb. 12-13. Graznak, who owns and operates Happy Hollow Farm of Jamestown, sells produce through a 72-member Community Supported Agriculture program and at the Columbias' Farmers Market.

Kathi Mecham, a University of Missouri Extension horticulture specialist and one of the conference organizers, says growers will receive tips on topics from brambles and Brussels sprouts to hydroponics, weed control and marketing strategies during a pandemic.

"We're pleased to offer an outstanding lineup of speakers from across the Midwest with expertise on how to grow and market local foods," says Mecham.

Sessions are 9 a.m. to 3:30 p.m. Graznak will deliver Friday's keynote. Saturday's keynote speaker is Vaughn Hammond of Vala's Pumpkin Patch and Apple Orchard in Gretna, Nebraska. A former extension educator, Hammond has experience managing hydroponic gardens and specialty crops, including sunflowers and squash.

Attendees can choose from several concurrent tracks, including marketing, tree fruits, small fruits, integrated pest management for vegetables, controlled-environment production and a North Central Region Sustainable Agriculture Research and Education Farmers Forum.

A virtual trade show will offer information on the latest seeds, tools, supplies, equipment and more.

Register at www.GreatPlainsGrowersConference.org. For questions, contact Mecham at mechamk@missouri.edu.

In addition to MU Extension, sponsors include extension programs at Lincoln University, University of Nebraska-Lincoln, Kansas State University and Iowa State University.

CLERKS & CASHIER: Gayle Garretson, Lorrie Marshall, Rita Voth

Wade Reh to serve as River Valley District Extension director

Wade Reh began serving as the River Valley District Extension director January 24, 2021. River Valley District has offices located in Belleville, Clay Center, Concordia, and Washington; Reh's primary office is Clay Center.

He earned his bachelor's degree in Animal Science from Oklahoma State University, and both his master's degree in Animal Science and his doctorate in Genetics from the University of California, Davis.

Reh has most recently been employed as an Agriculture and Natural Resources agent for K-State

Research and Extension in Kiowa County.

Extension directors provide administrative

leadership for budget and fiscal operations, personnel management of local staff, overall program development, delivery and evaluation, and assurance of accessibility to local programming by all individuals. He will also be working directly with the Agriculture and Natural Resources programs in the River Valley District.

Local Extension faculty are jointly employed in a partnership between K-State Research and Extension, headquartered on the Kansas State University campus in Manhattan, and the local Extension board.

The role of K-State Research and Extension is to encourage the adoption of research-based information to improve the quality of life for Kansans. K-State Research and Extension is the short name for the Kansas State University Agricultural Experiment Station and Cooperative Extension Service.

More information about K-State Research and Extension River Valley District is available by calling (785) 632-5335 or online at rivervalley.k-state.edu. Reh can be contacted via email at wreh@ksu.edu.

Kansas Corn Growers Association elects new board member; holds first virtual annual meeting

The Kansas Corn Growers Association (KCGA) held its first ever virtual annual meeting on January 28 following the Kansas Corn Symposium. Members received legislative and organizational updates, reviewed and approved 2021 resolutions and held board elections for the central districts.

Dennis McNinch, was elected to represent the west central district; Matt Splitter, Lyons, was re-elected to represent the central district and J.D. Hanna, Silver Lake, was re-elected to represent the east central district.

In a reorganizational

meeting following the annual meeting, the KCGA board elected officers. Brent Rogers, Hoxie, was re-elected president; J.D. Hanna, Silver Lake, was elected vice president; Chad Epler, Columbus, was elected secretary and

Kent Moore, Iuka, was re-elected treasurer.

KCGA represents it's more than 1200 members in legislative and regula-

tory issues and promotes Kansas corn and the farmers who grow it. Learn more at kscorn.com.

Uneven recovery in U.S. foodservice sector implies the same for animal protein

As COVID-19 spread across the country last year, it spurred the "great grocery grab of 2020" – a shift to at-home food consumption not seen since the early 1980s. The abrupt change also forced the most significant shift in meat supplies the industry has experienced, diverting massive volumes of meat and other food originally intended for restaurants into retail distribution channels and grocery stores.

U.S. animal protein supplies have returned to normal and foodservice sales have improved since the onset of the pandemic but may not return to pre-pandemic levels until the second half of 2022, according to a new report from CoBank's Knowledge Exchange.

"Trends in consumer demand for at-home and away-from-home consumption are central to the profitability and viability of the U.S. animal protein supply chain," said Will Sawyer, lead animal protein economist with CoBank. "As the U.S. foodservice sector climbs out of the hole left by 2020, the animal protein sector will not only need to re-align itself with the survivors of the last year, but also remain flexible."

The importance of individual foodservice channels varies significantly by animal protein species and by producer. Some foodservice channels have rebounded to achieve sales growth, as evidenced by the quick-service (QSR) and fast casual restaurant concepts that have recorded positive comparable-store sales since the summer.

Full-service restaurants, however, continue to face double-digit declines in sales. In November, full-service restaurant sales were down 36% compared to last year while total foodservice sales were down 17%. In-restaurant dining will be vulnerable as long as consumers remain wary of dining indoors and COVID-19 cases remain elevated.

Varying performance of the different foodservice channels is especially evident in U.S. beef consumption. While ground beef makes up a majority of beef volume through foodservice, it represents only about one-third of the value due to its low price point.

In the limited-service restaurant channels, ground beef has performed quite well, but the beef sector continues to be hurt by the depressed full-service restaurants, hotels, and education channels. High-value steaks and roasts that are primarily sold in these channels only make up a quarter of the volume of beef sold through foodservice but account for nearly half of beef sales.

The beef and pork sec-

tors have some flexibility to adapt, as major packers sell their products to a variety of retail, foodservice and export customers. In the poultry sector, however, many integrators and

poultry plants focus either on retail or foodservice, but not necessarily both. Poultry producers that focus on retail and fast-food chains have fared reasonably well during

the pandemic. Others will need to continue their focus on cost and supply reduction until foodservice demand normalizes, which could easily be one or two years away.

Aggieville Showdown is a one-of-a-kind cattle show

By Toni W. Riley
Anyone who has been to a cattle show knows the excitement of the Grand Drive. The class winners return to the ring, there are whispers as the judge evaluates one more time, a hush falls over the spectators as the judge goes to the microphone and makes final comments. Then cheers erupt as the grand champion animal is selected.
Now imagine the Grand Drive is in downtown Aggieville, Manhattan, Kansas - that's right, right in the heart of the "Ville." That's just what will happen on the evening of April 17, when the Aggieville Showdown brings its division champion market animals and breeding heifers to a 36x48-foot showing on Moro Street in the heart of historic Aggieville.
Aggieville Showdown is the brainchild of Christian

Calliham, who graduated from Kansas State University in May of 2020 with a degree in Agribusiness with an emphasis in Marketing.
He recalled how he and some friends enjoyed an evening in Aggieville, the community that developed connecting Kansas State University and Manhattan. The group was discussing the divide between rural and urban. "I just said, wouldn't it be great if we could have a cattle show right here in Aggieville," Calliham recalled. With that simple pronouncement, the Aggieville Showdown began to develop.
But bringing such an event to the center of a thriving business district with over 100 unique businesses, including restaurants, bars, and specialty shops, was no easy task. Calliham put his marketing degree to work when he

approached Dennis Cook, the director of the Aggieville Business Association. Cook said when Calliham pitched the idea to him, "I was all for it!! When I approached the Business Association Board of Directors, I was expecting some pushback, but they were immediately excited." Cook went on to say that the board said it sounded like a truly unique event, very different and is generating a great deal of excitement in the business district.
The establishment of an advisory board was an important element to make the Aggieville Showdown vision into an actual event. The board members provide industry knowledge to insure the event educates the general public about agriculture. Representing diverse agriculture backgrounds, board members and are essential to help

exhibitors and the spectators who will be from all walks of life have the best experience possible.
The Aggieville Showdown, which is open to any youth exhibitor age eight to 25 years old, was postponed from 2020 due to COVID-19 restrictions to the spring 2021. Even with the cancellation of the 2020 show, the Showdown team never stopped planning and used the extra year to expand the inaugural event. The 2021 Showdown will include a western clothing fashion show, a concert with country recording artist Lucas Maddy, a cowboy poet, and vendors providing unique shopping experiences leading up to the climax - the Grand Drive.
The event will begin on April 16 when exhibitors, which Calliham expects from all over the country, start arriving at the Riley

County Fairgrounds. The show, billed as a prospect cattle show, offers \$5,000 in prizes, begins at 9:00 a.m. on the 17th with showmanship, followed by market steers/heifers and then breeding heifers.
At 6:30 p.m., the event will move to Moro Street beginning with the pre-drive entertainment. No other cattle show in the nation has created a Grand Drive in the center of a famous business district. Aggieville has an Old West charm with wooden storefronts and antique marquees. Calliham has connected the atmosphere of Aggieville with the show's logo, featuring the outline of a theater marquee. While the theater is now Rally House, the marquee is visible the length of Moro Street and a recognizable Aggieville symbol.
The moment everyone has been waiting for will

begin later that evening, when the division-winning steers step onto a city street - a one of a kind showing. Breeding heifer selection will follow the steers, and then the announcement of the showmanship winners and the evening will culminate with live interviews from the winners.
Calliham hopes these interviews, as well as discussions around the ring, will begin conversations about the cattle industry.
"I want the Aggieville Showdown to let people learn about the cattle industry. I want them to see the hard work and determination that goes into raising and showing cattle."
For additional information about the Aggieville Showdown, including entry fees and deadlines: go to www.aggievilleshowsdown.com.

Angus announces new regional manager internship for fall 2021

The 13 regional managers of the American Angus Association® are the boots-on-the-ground Angus experts who wear many hats. This fall, the American Angus Association's field services team is ex-

pected to offer the new 2021 Regional Manager Internship, which is designed to enhance a student's ability to build effective relationships, craft a promotional strategy and learn about the Angus business and

cattle industry. The nine-week, full-time internship begins in August and lasts until December and will be based at the American Angus Association headquarters in St. Joseph, Mo., with numerous opportunities to travel to different regions of the country.

From assisting with herd visits to securing advertising in the *Angus Journal* and *Angus Beef Bulletin* to providing insight to the breeder, the regional manager intern will gain valuable hands-on, real-world experience in the Angus business.

"The Regional Manager Internship provides a unique learning experience for rising junior and senior college students interested in a career as a field representative with a breed association or similar positions within the industry," said David Gazda, regional manager and director of field services. "It will provide an opportunity to gain valuable work experience and exposure to all entities and departments of the Association from conception to end product. Most importantly, this internship will provide an individual hands-on experience and a greater insight into the role regional managers perform as a representative of the Association and the skills sets required to serve successfully in this position."
The selected intern will have the opportunity to promote the Angus breed and represent the American Angus Association by attending production sales, shows and other

events.
"The role of the regional manager is what truly drives the advancement and connection within the Angus breed. This team of dedicated professionals serve as a trusted resource for Angus breeders and buyers of Angus genetics by delivering information, guidance and support across all aspects of the Association and its entities," said Brett Spader, Angus Media president. "This internship is a unique opportunity to become familiar with all aspects of the Angus breed while having a meaningful impact on Angus breeders."
Those interested in applying should send a resume, cover letter and references to careers@angus.org by May 1, 2021. Visit angus.org/careers for the internship description and requirements.

Yard & Garden Tips By Gregg Eyestone Vegetable Gardening

A vegetable garden will provide tasty food and a sense of accomplishment. One good thing from the last 11 months has been an increase in gardening. The food that a garden provides makes a valuable contribution to a healthy diet. I garden for the challenge it provides to me.

Space is needed to grow plants. Many plants can do quite nicely in a container. I like to grow salad crops and at least one tomato in a container. Other crops get planted in the field.

Riley County has several community gardens available for gardeners without space for gardening. The City of Riley, Meadowlark, Jardine at KSU and Manhattan have available plots. Manhattan's plots range in rent from \$25-50. Lower rates are available for reduced

income households. Water, tools, mulch, and compost are provided. Gardeners are required to give back four hours of volunteer service. Ask at communitygarden@tryufm.org or check out <https://tryufm.org/community-gardens>. The next sign-up for the Manhattan plots is February 6 at 9:30 a.m.

A wonderful resource for all vegetable gardeners is the K-State Research and Extension publication the *Kansas Garden Guide*. This 80-page publication explains what is needed to be successful growing vegetables here. There are 18 pages discussing individual crops from asparagus to watermelon.

It can be viewed and downloaded for free from www.ksre.ksu.edu. We have copies for sale at the Extension office for \$5. You

are more than welcome to come get a copy.

Other publications to consider are *Recommended Vegetable Varieties* and *Vegetable Garden Planting Guide*. Planting the best variety can make or break the productive garden. Research the best for your garden. Many more publications and videos are online at www.hnr.ksu.edu/extension/info-center.

You can find out more information on gardening by going to Riley County's K-State Research and Extension website at www.riley.ksu.edu. And you may contact Gregg Eyestone at the Riley County office of K-State Research and Extension by calling 537-6350 or stopping by 110 Courthouse Plaza in Manhattan or e-mail: geyeston@ksu.edu

Valued Partners

By Miranda Reiman
My sister and I had a name, a self-created logo, an inkjet printer and a handful of steers we fed and sold as freezer beef. We had a business that kept us occupied most of the year and eventually earned enough money to buy our first vehicles. Over the long haul, we had something that inspired both of us to take a keen interest in animal science.

We also had our first partnership.

There were easy advantages to doing it as a team. We'd often trade off morning and afternoon chores. Yet if the automatic waterer froze—as it often did in the dead of a Minnesota winter—then it was all hands on deck to get it

taken care of before the school bus came.

Perhaps your first partnership was also with family. Maybe it was a business arrangement. Maybe it was a little of both, like ours (signing our names next to each other on the operating note made it extra-official).

If you've ever wanted to dip your toe into feeding an undivided share of your calves after weaning without assuming all the risk, you might have partnered with a cattle feeder. Maybe you were once the younger generation, getting a start by keeping some cows in a herd with an established producer. Maybe you're currently giving somebody a foray into the business yourself.

There are partnerships all across the beef business, but they're not always as clean as who will bale the hay and who is going to feed it.

Some are less direct, but equally as important.

It's the person who helps you decide on a grazing strategy or the vet who gets that weaning program tweaked just right. It's the video rep who gives you pointers or the bull customer who comes back year after year.

They're partners. They're wholly interested in your success, just as you are in theirs. You have shared goals.

And in the end, it's the consumer who buys beef by the grade or brand, knowing they'll get exactly what they expect every single time. It's a trust. A partnership.

Do you focus what you can do to make life better for those at the next link in the beef chain? Are your cattle profitable for you and your buyer and your buyer's buyer, too?

What are you doing to hold up your end of the bargain?

Next time in Black Ink, I'll write about the next step.

How to maximize meat goat rate of gain

Raising meat goats calls for a sharp pencil when it comes to feed costs since they nearly always account for the largest share of expenses. Balancing feed quality to maximize weight gain is vital to amplify your nutrition investment and bring home more profit.

Placing a focus on providing diets containing proper forage, protein and energy levels that drive efficient gain is a good objective to keep in mind.

"Efficient rate of gain maximizes conversion of feed to gain without over-feeding," says Clay Elliott, Ph.D., small ruminant nutritionist with Purina Animal Nutrition. "The goal is to provide enough energy, protein and forages to maximize an animal's genetic potential."

Use these three tips to maximize your nutrition program to support efficient goat growth:

1. Ensure adequate dietary protein and energy

Meat goat diets must contain both protein and energy to be productive. "Energy from carbohydrates and fats drives growth rates and weight performance while protein is important to support feed intake and digestion," says Elliott.

Insufficient dietary protein levels can negatively affect growth rate, disease resistance and more because not enough amino acids reach the intestines to be absorbed by the body.

Lush forages can pro-

vide adequate fat and protein levels, but high-quality forages are not always available or cost-effective when purchased in large volumes. That's when strategic supplementation can help efficiently boost diet effectiveness.

"Feeding a supplement high in both protein and fat can help improve appetite, rate of gain and efficient cost of gain," says Elliott. "Adding a supplement like Purina® Goat Grower-Finisher 14 with Lambitine™ helps goats get more from their feed, especially when forage quality is low or when goats are in pens and not on pasture. It can be used at every stage of a goat's life and in all aspects of production."

Make sure to choose a supplement with the right balance of dietary fat since excess fat (generally more than 5% of the total diet) can suppress rumen fermentation.

2. Maintain forage quantity and quality

Goats need plenty of high-quality forage for efficient growth - between 1.5% and 2% of a goat's body weight. High forage levels are important even in dry lots when you may be supplementing diets more heavily to increase gains and reduce days on feed.

Purina® Goat Grower-Finisher 14 contains fiber to aid in digestibility, but it's still important to feed adequate dietary forage to maintain rumen

health. And, adequate forage is particularly important for goats receiving higher fat and protein supplementation levels.

"I'm a big proponent of keeping rums healthy," says Maggie Amburgey, small ruminant technical specialist with Purina Animal Nutrition. "When goats don't receive enough forage, they aren't as efficient at converting supplemental protein or energy into meat."

3. Aim for consistent, achievable weight gains

Whether raising meat

goats for market or as replacement females, steady growth is the goal.

"Achievable daily gains depend on goat genetics, but gains of 0.25 to 0.3 pounds per day is a good benchmark," says Amburgey. On full feed, it takes about 3.75 to four pounds of supplemental feed per head per day to reach that goal.

On the flip side, it's important to understand when goats have reached their maximum efficient growth potential.

"Producers should rec-

ognize when goats are no longer growing but are only gaining fat. Monitoring body condition score (BCS) and not letting goats get above a three out of five BCS will help," says Elliott. "Getting goats to market at the right time

is more efficient and will save on unnecessary feed costs."

Contact your local Purina nutritionist or visit purinamills.com/goat-feed to learn more about how to maximize efficient goat gains.

TEGMA elects officers for 2021

Transportation, Elevator and Grain Merchants Association (TEGMA) members have elected Terry McDermott, director of supply chain, Bunge North America, as chairman. The election came at the Association's virtual annual meeting held January 21, 2021. In taking office, McDermott thanked outgoing chairman Scott Mills with The Andersons for his dedicated service to the organization.

The group elected Wyatt Brummer, vice president-western rail grains, The Scoular Company, as first vice chairman. Greg Beck, senior vice president, Grain Division, CGB Enterprises, was elected second vice chairman.

Active members re-elected to three-year terms on the Board of Directors were:

Wyatt Brummer, The Scoular Company, Overland Park
Aaron Reid, J.D. Heiskell & Company, Omaha, Neb.
Joe Smith, Arizona Grain, Casa Grande, Ariz.

In addition, Shaun Meiners, director-logistics, The Andersons, was elected to complete the remaining term of Scott Mills on the Board of Directors.

Elected by members to one-year terms on the Board were representatives of Associate Members: Jeff Yoakum, Bank of America and Katie Hadenfeldt, GATX. Chairman McDermott thanked outgoing Board Member Alan Koenig with GrainCraft for his service on the Board.

The newly elected board members join the following incumbents on the Board.

Greg Beck CGB Enterprises, Inc. Mandeville, La.
Patrick Bryan Pacificor LLC, Portland, Or.
Angela Caddell, BNSF Railway, Fort Worth, Texas
Brad Thrasher, Union Pacific Railroad, Omaha, Neb.
Terry McDermott, Bunge North America, St. Louis, Mo.

TEGMA staff officers are Bob Petersen, president, and Erica Venancio, secretary-treasurer.

TEGMA is a North American trade association whose members include leading grain shipper, receivers and rail carriers, as well as many related businesses.
