CVR Disk Tree Cutter

Made of durable, professional-grade steel, the device mounts securely to your equipment and cuts trees up to 8" thick in seconds. The CVR 8 inch Disk Tree Cutter can cut tens of dozens of trees per hour. Unlike tree shears, the CVR Disk Tree Cutter requires no external power source or stopping and waiting for hydraulic jaws to open and close around the tree.

Key features include:

AR-400 tempered steel blades and a durable, corrosion-resistant powder coat finish.

4" easily mounts on ATV's and small tractor/skidsteer buckets. Or for bigger trees and equipment, the 8" easily mounts to tractor and skid steer loader buckets. Cuts off flush with the ground. Perfect for Mesquite Trees (and all other species) up to 8 inches. 60 day warranty.

The Quality We Breed

It's not easy. Significant progeny genetic value is important. We have to look for reasonable caving ease, top end growth, efficiency, disposition, soundness, fertility and convenience traits. We are proud of our high fertility females and do our best to use proven multi-trait superior AI Sires.

It takes time and resources to build the good progeny into a herd, we've done our best. Come see what we've done. We think you will be impressed with the quality we've bred.
